## Point-Discharge 2018-2019 Nutrient Monitoring Data Summary

### Water Quality Advisory Committee Meeting

June 14, 2022

Elaine Panuccio

Water Resource Scientist,  
Science & Water Quality Management, DRBC

Presented to an advisory committee of the DRBC on June 14, 2022. Contents should not be published or re-posted in whole or in part without permission of DRBC.

# Background

- 71 point-discharge facilities within Zones 3 through upper 5 monitored during the first round of nutrient monitoring initiated in 2011
  - All facilities monitored for 2-yr period
  - Characterized point-discharger nutrient loads
- **32 facilities** identified for second round of monitoring conducted 2018 – 2019
  - Eutrophication Model calibration period
    - **Tier 1 Facilities (12)** → Weekly monitoring
    - **Tier 2 Facilities (20)** → Monthly monitoring
- Model incorporates Tiers 1 – 3 facilities
  - This presentation and data summary covers Tiers 1 & 2

# 2018 - 2019 Additional Monitoring

## (12) Tier 1 facilities monitored weekly

| <b>Tier 1 Facilities (12)</b>             |                  |
|---|------------------|
| Facility Name                             | NPDES Permit No. |
| City of Wilmington                        | DE0020320-001    |
| City of Trenton                           | NJ0020923-001A   |
| Willingboro Municipal Utilities Authority | NJ0023361-001A   |
| Gloucester County Utilities Authority     | NJ0024686-001A   |
| Camden County MUA                         | NJ0026182-001A   |
| Hamilton Township - Wastewater Utility    | NJ0026301-001A   |
| Lower Bucks County JMA                    | PA0026468-001    |
| Philadelphia Water Department Southeast   | PA0026662-001    |
| Philadelphia Water Department Southwest   | PA0026671-001    |
| Philadelphia Water Department Northeast   | PA0026689-001    |
| Morrisville Borough Municipal Authority   | PA0026701-201    |
| DELCORA                                   | PA0027103-001    |

**32 total point-discharge facilities**

**(20) Tier 2 facilities monitored monthly**

## Tier 2 Facilities (20)

| Facility Name                                  | NPDES Permit No. |
|--|------------------|
| Delaware City Refinery                         | DE0000256-601    |
| Kent County Dept of Public Works               | DE0020338-001    |
| Paulsboro Refining                             | NJ0005029-001A   |
| Valtris Specialty Chemicals (previously Ferro) | NJ0005045-001A   |
| Chemours Chambers Works                        | NJ0005100-662A   |
| Pennsville Sewerage Authority                  | NJ0021598-001A   |
| Burlington Township Public Works               | NJ0021709-002A   |
| Riverside Water Reclamation Authority          | NJ0022519-001A   |
| Delran Sewerage Authority                      | NJ0023507-001A   |
| Florence Township STP                          | NJ0023701-001A   |
| Cinnaminson Sewerage Authority                 | NJ0024007-001A   |
| Mt Holly Municipal Utilities Authority         | NJ0024015-001A   |
| Cumberland County Utilities Authority          | NJ0024651-001A   |
| Burlington City STP                            | NJ0024660-002A   |
| Bordentown Sewerage Authority                  | NJ0024678-001A   |
| Moorestown Twp WWTP                            | NJ0024996-001    |
| Mt Laurel Municipal Utilities Authority        | NJ0025178-001A   |
| City of Millville STP                          | NJ0029467-001A   |
| Bristol Borough Water & Sewer Authority        | PA0027294-001    |
| GROWS Landfill, Waste Management               | PA0043818-001    |

# Eutrophication Model Calibration and Development

- Resolution 2017-4 “Analysis of Attainability”
  - Study element: development of loading conditions
- Nutrients and related data collected for eutrophication model
- **2018 – 2019** selected as model calibration period
  - DRBC staff conducted intensive Tributary Nutrient Monitoring during the same period to account for tributary loads
    - The purpose of this presentation is to summarize the Point-Discharge Nutrient data

# Point Discharge Nutrient Monitoring Data Collection and Estimated Loadings

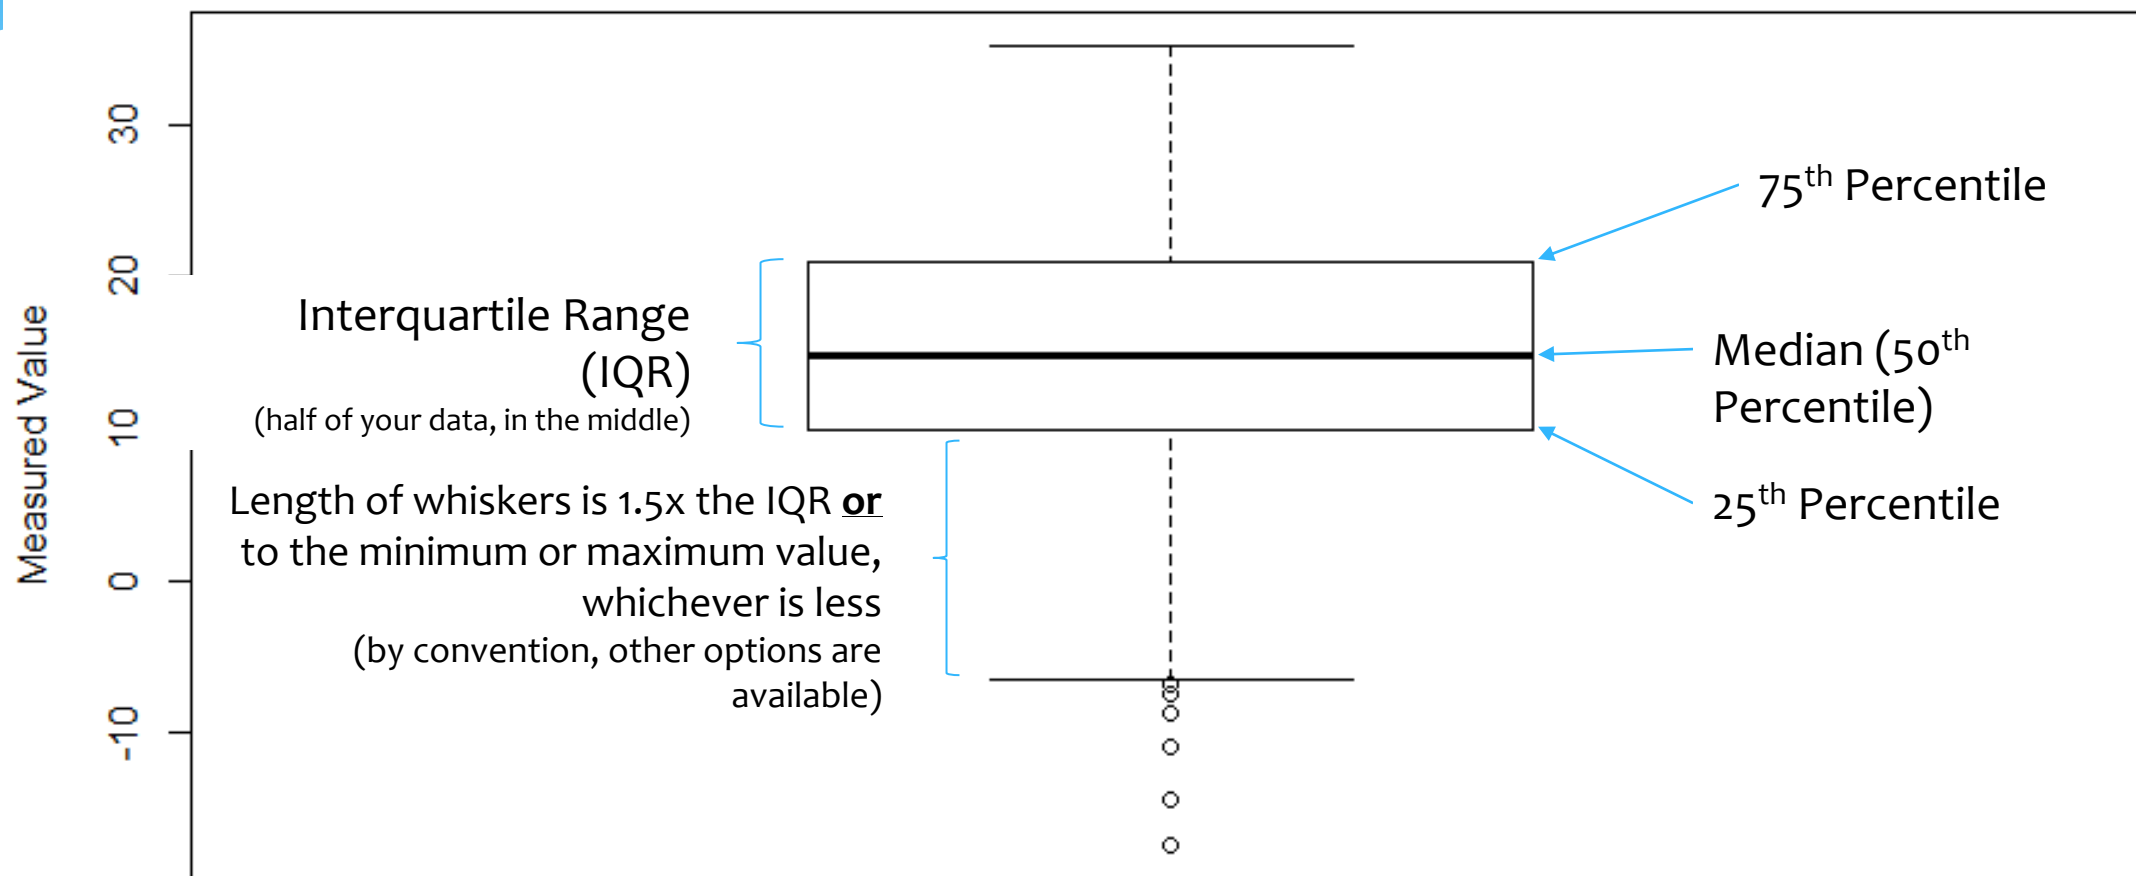

- **39,608** datapoints of monitoring results were utilized in this assessment and as model input data (this total includes additional data that facilities submitted)
- Loads assessed in this summary calculated prior to model development
  - Concentration multiplied by flow for each record (typically 104 records for Tier 1 facilities and 24 records for Tier 2 facilities)
- Non-detected results replaced with half of the Method Detection Limits

| Analytical Parameter                        | Units         | Filtration              | Sample Type       |
|---|---------------|-------------------------|-------------------|
| Total Phosphorus (TP)                       | mg/L as P     | Unfiltered              | 24-hour composite |
| Total Kjeldahl Nitrogen (TKN)               | mg/L as N     | Unfiltered              | 24-hour composite |
| Nitrate Nitrogen (NO <sub>3</sub> -N)       | mg/L as N     | Unfiltered              | 24-hour composite |
| Nitrite (NO <sub>2</sub> -N)                | mg/L as N     | Unfiltered              | 24-hour composite |
| 20-day BOD (BOD <sub>20</sub> )             | mg/L          | Unfiltered              | 24-hour composite |
| 5-day Carbonaceous BOD (CBOD <sub>5</sub> ) | mg/L          | Unfiltered              | 24-hour composite |
| Chemical Oxygen Demand (COD)                | mg/L          | Unfiltered              | 24-hour composite |
| Dissolved Organic Carbon (DOC)*             | mg/L          | Filtered                | 24-hour composite |
| Total Organic Carbon (TOC)                  | mg/L          | Unfiltered              | 24-hour composite |
| Total Suspended Solid (TSS)                 | mg/L          | Unfiltered              | 24-hour composite |
| Soluble Reactive Phosphorus (SRP)           | mg/L as P     | 0.45 µm membrane filter | 24-hour composite |
| Soluble Kjeldahl Nitrogen (SKN)             | mg/L as N     | 0.45 µm membrane filter | 24-hour composite |
| Ammonia Nitrogen (NH <sub>3</sub> -N)       | mg/L as N     | 0.45 µm membrane filter | 24-hour composite |
| Discharge Flow<br>(*or higher frequency)    | MGD           | N/A                     | 24-hour mean*     |
| Water Temperature                           | °C            | N/A                     | 24-hour mean      |
| Dissolved Oxygen                            | mg/L          | N/A                     | 24-hour mean      |
| pH  | 1-14          | N/A                     | 24-hour mean      |
| Specific Conductance or TDS                 | µS/cm or mg/L | N/A                     | 24-hour mean      |

# Parameters Monitored 2018 - 2019

- Parameters summarized
  - Discharge flow
  - Ammonia
  - Nitrate
  - Total Phosphorus
  - Soluble Reactive Phosphorus
  - CBOD-5
  - Total Organic Carbon
- Summaries of other parameters included in data summary report (in progress)

# What is a Boxplot?

# Discharge Flow, MGD

**Tier 1 Range:**  
3.87 – 185 MGD

**Tier 2 Range:**  
0.19 – 13.8 MGD

# Ammonia Concentration Boxplots

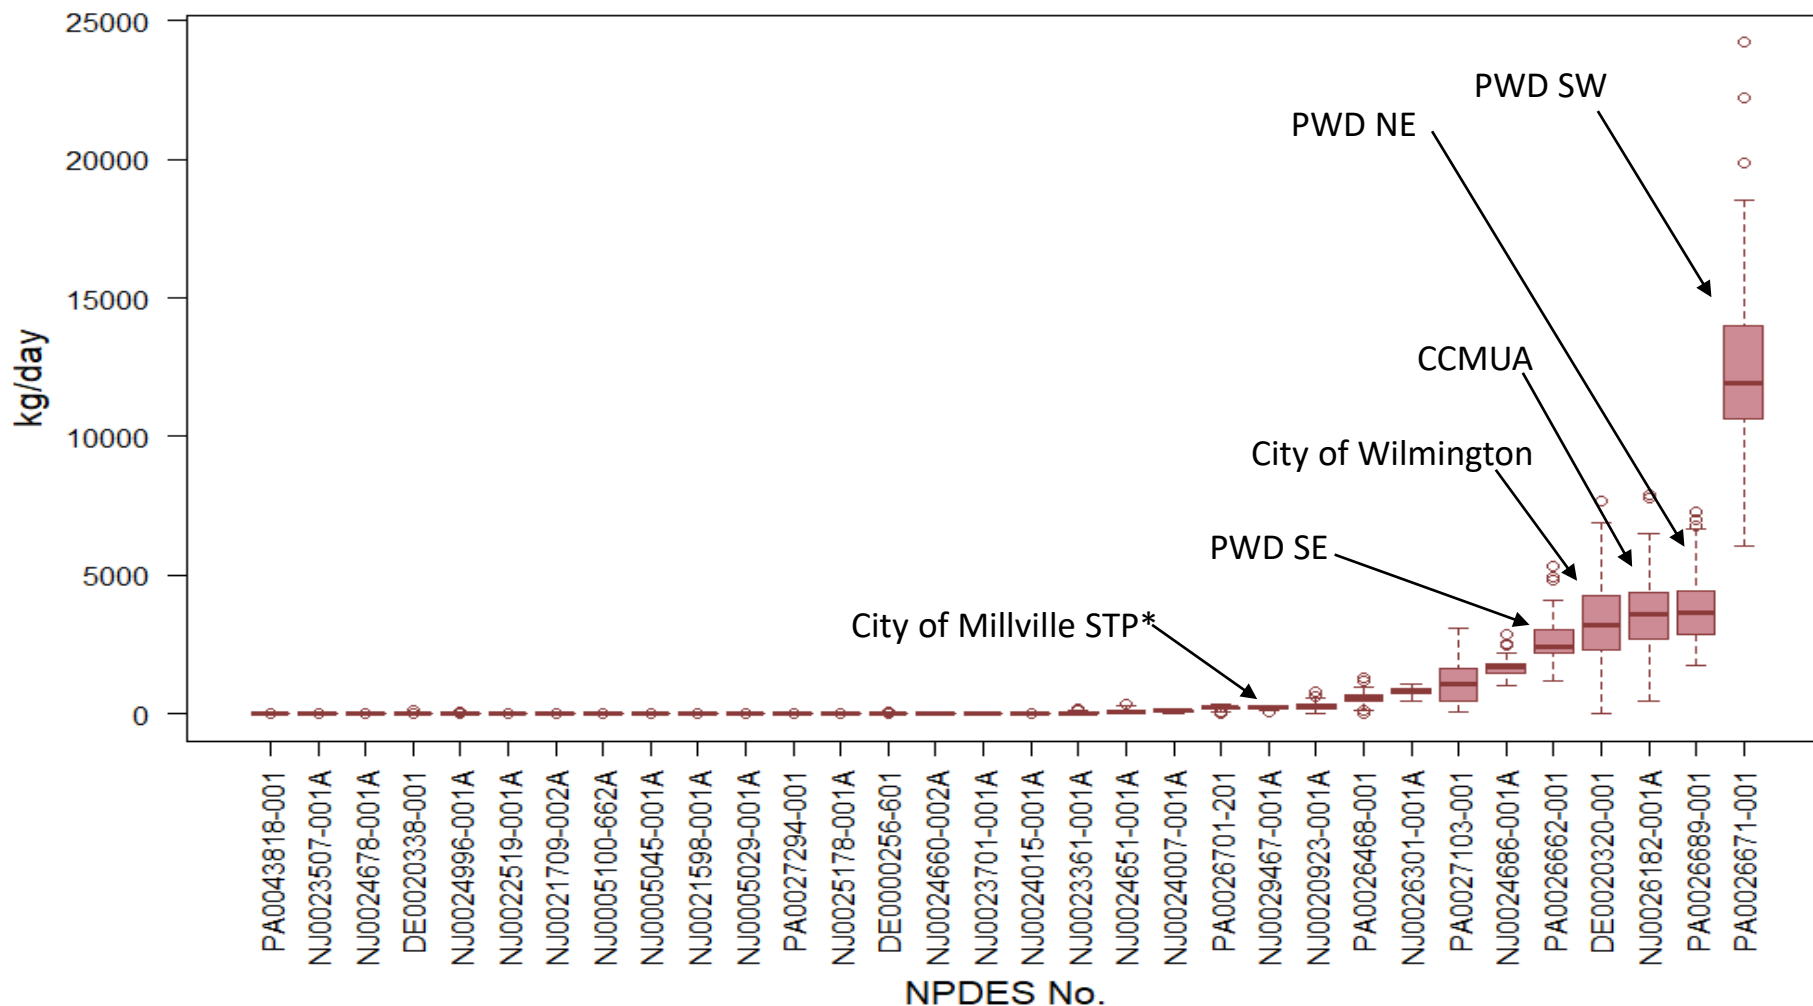

2018 – 2019  
 Tier 1 & Tier 2 Facilities  
 Ranked Point Discharger  
 Ammonia Concentration Data

Range of  
 medians:  
 0.025 – 28.5  
 mg/L

# Total Phosphorus Loading Boxplots

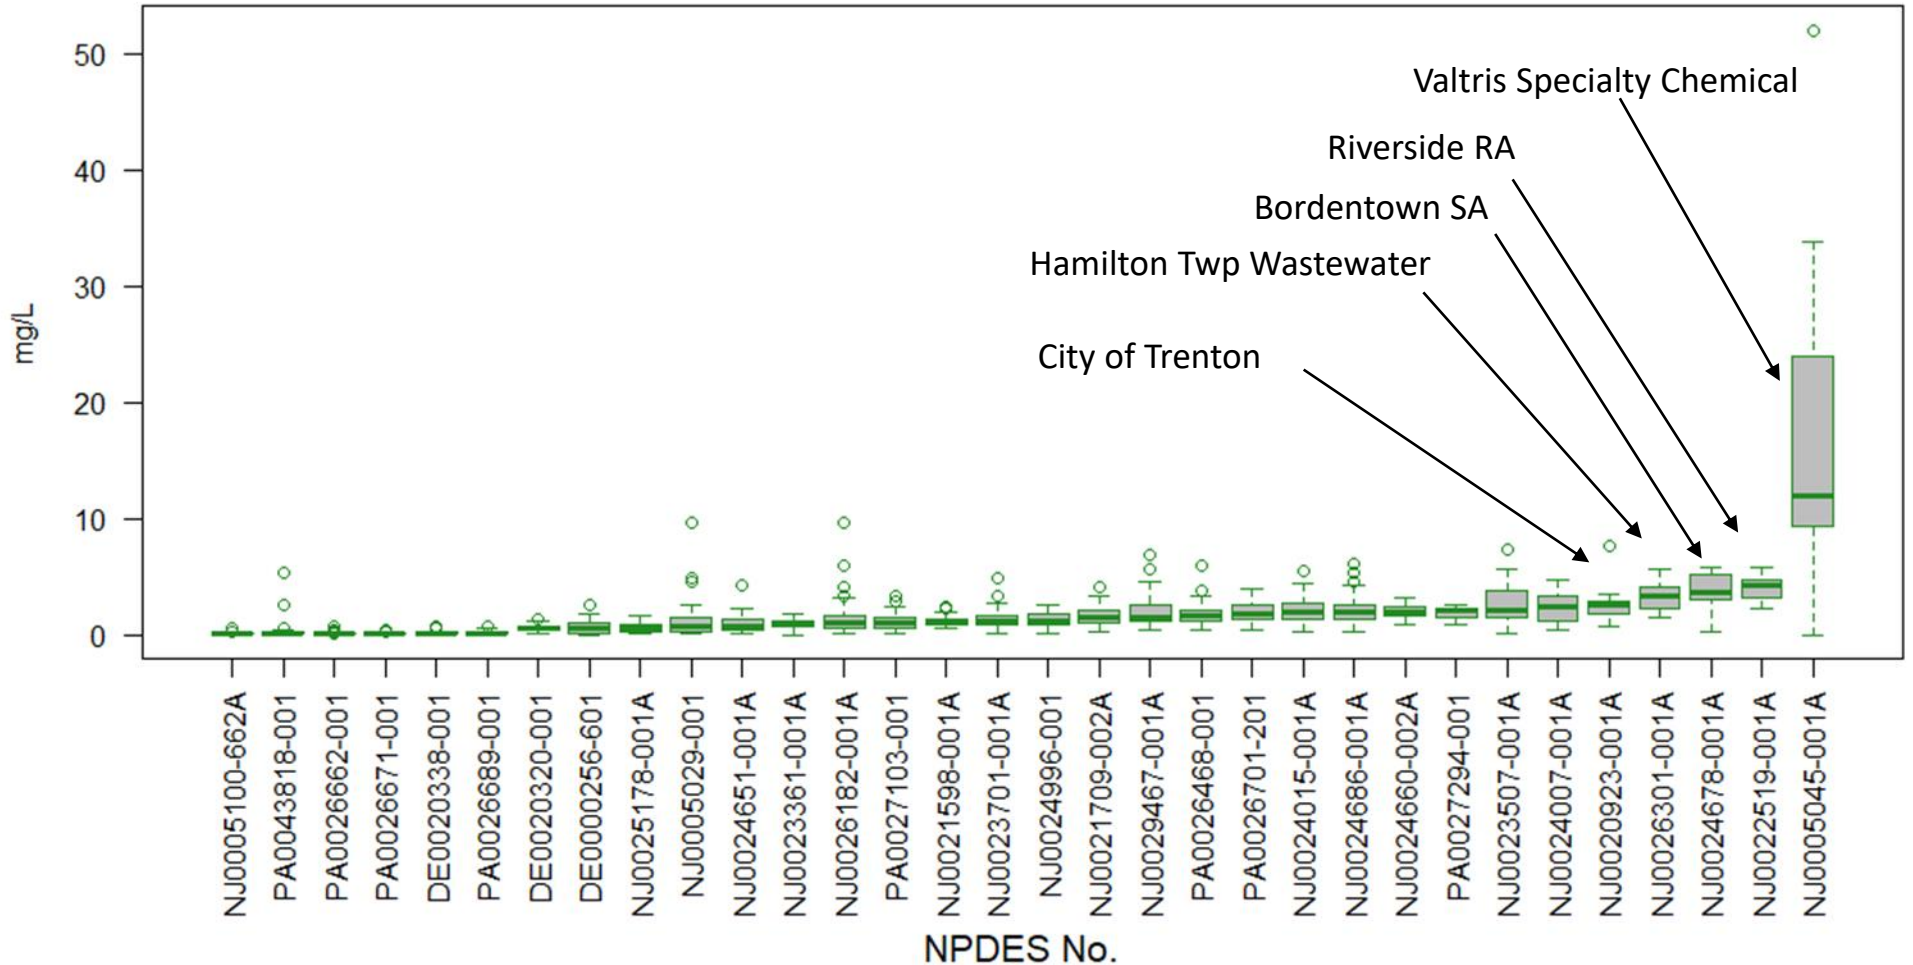

Range of medians:  
 13.3 – 286  
 kg/day

# Soluble Reactive Phosphorus Concentration

## Boxplots

2018 – 2019  
Tier 1 & Tier 2 Facilities  
Ranked Point-Discharger  
SRP Concentration

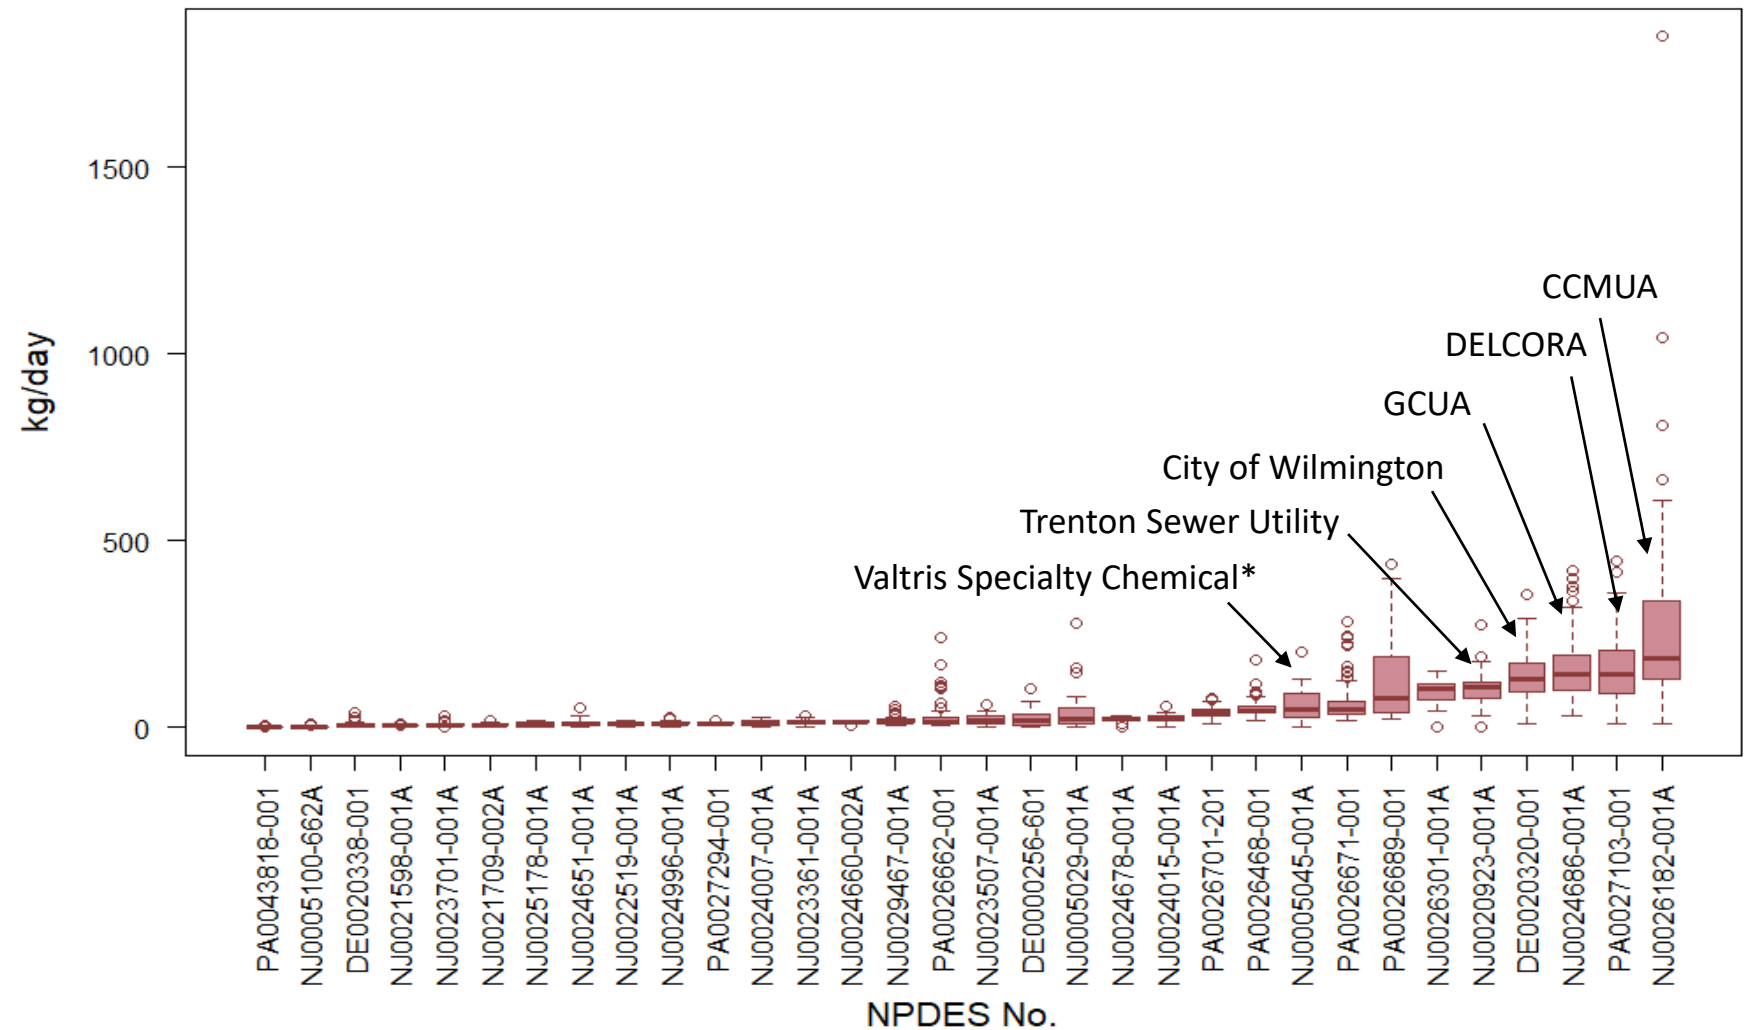

Range of  
medians:  
0.04 – 12.0  
mg/L

Excluding  
Valtris:  
0.04 – 4.20  
mg/L

# Soluble Reactive Phosphorus Loading Boxplots

2018 – 2019  
 Tier 1 & Tier 2 Facilities  
 Ranked Point Discharger  
 Soluble Reactive Phosphorus Loadings

Range of  
 medians:  
 0.90 – 178  
 kg/day

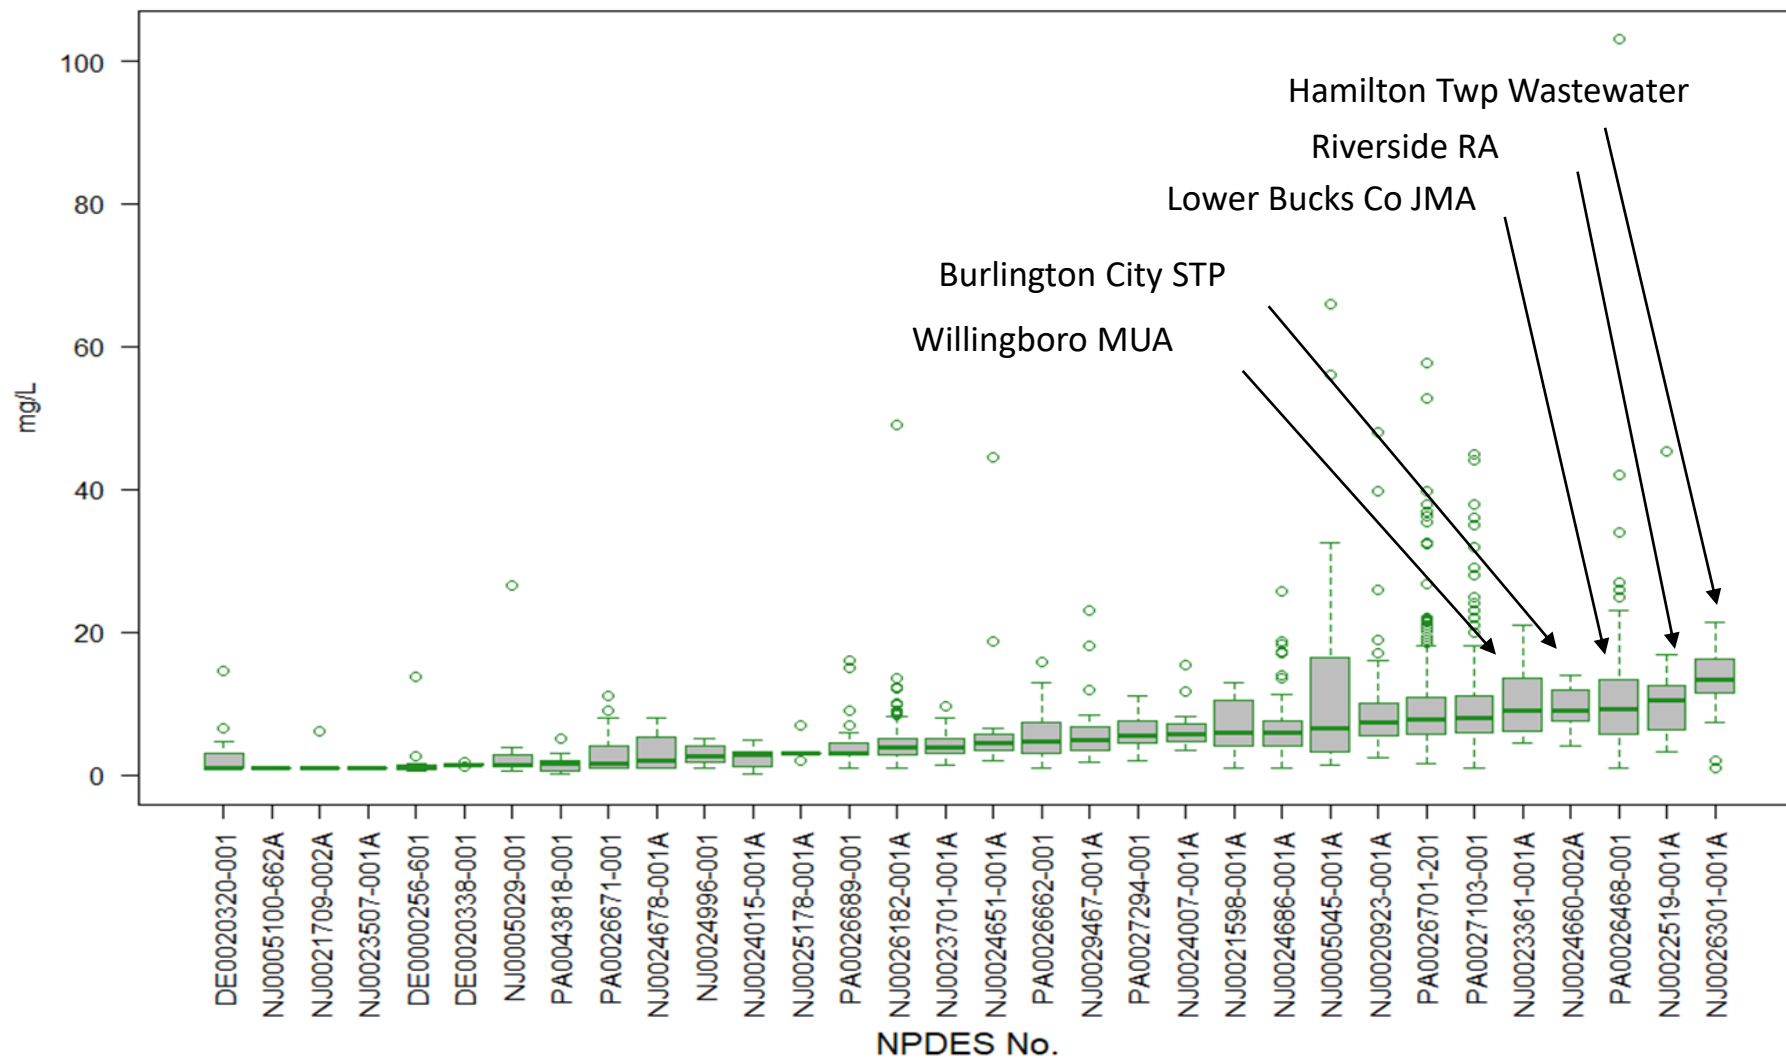

# CBOD5 Concentration Boxplots

2018 – 2019  
 Tier 1 & Tier 2 Facilities

Ranked Point-Discharger  
 CBOD-5 Concentration

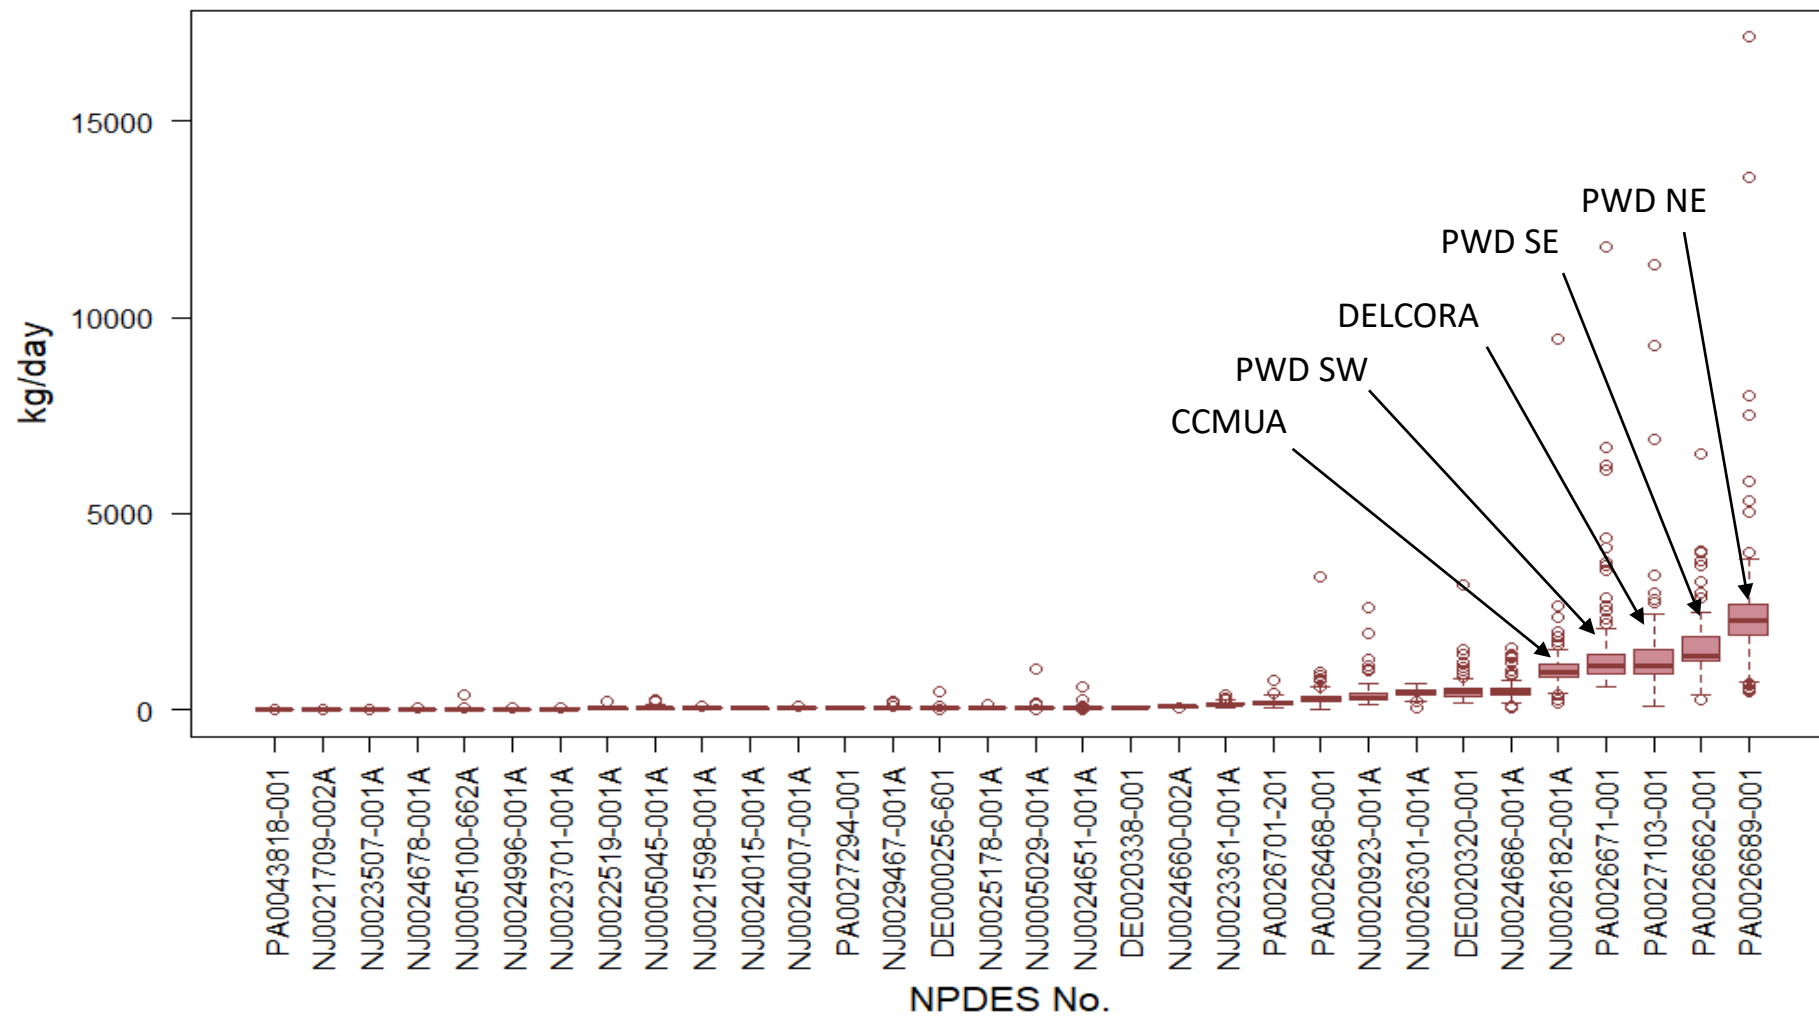

Range of  
 medians:  
 1.00 – 13.4  
 mg/L

# CBOD5 Loading Boxplots

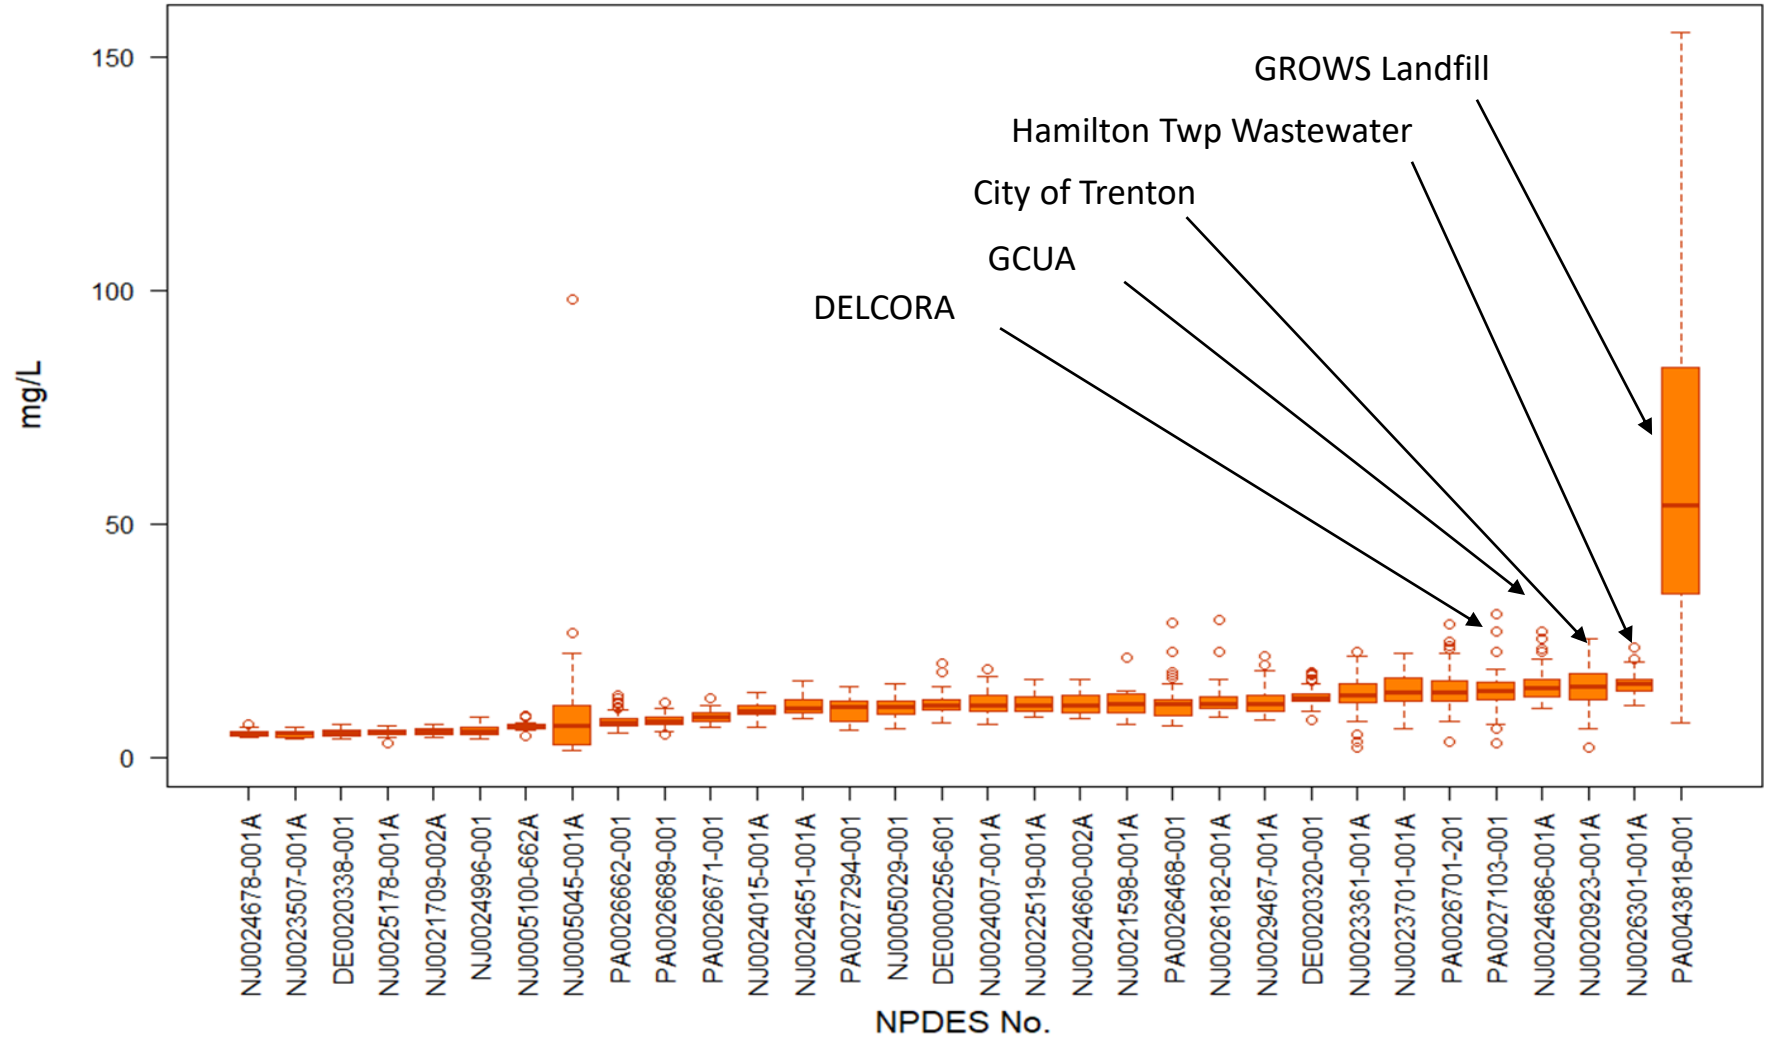

2018 – 2019  
 Tier 1 & Tier 2 Facilities  
 Ranked Point-Discharger CBOD-5 Loadings

Range of  
 medians:  
 5.00 – 2,237  
 kg/day

# Total Organic Carbon Concentration Boxplots

2018 – 2019  
 Tier 1 & Tier 2 Facilities  
 Ranked Point Discharger  
 Total Organic Carbon Concentration Data

Range of medians: 4.95 – 54.0 mg/L

Excluding GROWS Landfill: 4.95 – 15.7 mg/L

# Total Organic Carbon Loading Boxplots

2018 – 2019  
 Tier 1 & Tier 2 Facilities  
 Ranked Point Discharger  
 Total Organic Carbon Loadings

Range of  
 medians:  
 33.0 – 5,586  
 kg/day

# Ratios of Nitrate-N : Ammonia-N

## Tier 1

Tier 1 Point Dischargers Relative % of NO<sub>3</sub>+NO<sub>2</sub> and Ammonia

- A majority of Tier 1 facilities, which include the largest municipal facilities, discharge relatively **more ammonia** compared to nitrate
- Indicates less oxidation of reduced forms of nitrogen
- Impacts oxygen demand of receiving waterbody

# Ratios of Nitrate-N : Ammonia-N

## Tier 2

Tier 2 Point Dischargers Relative % of NO<sub>3</sub>+NO<sub>2</sub> and Ammonia

- Comparatively, a majority of Tier 2 facilities discharge a greater portion of oxidized forms of nitrogen (less oxygen demand in the receiving water body)
- Exceptions:
  - City of Millville STP
  - Cumberland County UA
  - Cinnaminson SA

# Caveats and Additional Information

- This summary and subsequent report includes Tier 1 & Tier 2 facilities
- Some facilities submitted additional/more frequent data when available
- Data presented during this meeting covers concentration data results and loadings based on the data submitted
  - This is not the same as modeled inputs, which are continuous

# Modeled Loads vs. Loads Estimated in Summary (Example: Ammonia)

Cumulative NH4 Percent Load Contribution (2018-2019)  
 PS Discharge contributed greater than 1% are shown in Orange

*Modeled loads\**

Cumulative NH4 Percent Load Contribution (2018-2019)  
 Point Source Discharge Facilities (Tiers 1 & 2)

# Summary

- **Monitoring effort completed successfully**
- **Data were fully utilized for model development and calibration**
- **High concentrations do not always indicate high loading facilities**
- **Ammonia – smaller facilities undergo more nitrification of effluent compared to larger municipalities**

# Report in Progress

- **Technical summary report of point discharge 2018 – 2019 data**
  - **Draft currently under internal review**
- **Includes statistical summaries, data tables, and more nutrients and parameters**
