DIE CUT SHAPES

TIPS & TRICKS

ALPHABETICAL SHAPE LIST

SHAPE LIST BY SUBJECT

HOW-TO GUIDE

REVISED FEBRUARY 2023

THIS BOOKLET IS FOR REFERENCE ONLY

TIPS & TRICKS

PAPER

PAPER CAN BE FOLDED OR STACKED (UP TO 4 PIECES) TO CUT MULTIPLE COPIES OF THE SAME DIE AT ONCE – JUST MAKE SURE TO DEPRESS THE HANDLE A FEW EXTRA TIMES TO CUT ALL THE WAY THROUGH THE PAPER

MATERIALS

IF YOU CAN CUT IT WITH A SCISSORS – YOU CAN PROBABLY DIE CUT IT!
PAPER, CARD STOCK, POSTER BOARD, FELT, FABRIC, BUBBLE WRAP, SANDPAPER...
NOT SURE – JUST ASK!

LAMINATING

IF YOU WANT YOUR INDIVIDUAL SHAPES TO BE LAMINATED – LAMINATE THE PAPER FIRST AND THEN CUT THE SHAPE. **CUT ONCE AND DONE!**

FOLDED OR CONNECTED CUTS

WANT TO MAKE A BOOK OR A STREAMER EFFECT? TURN TO THE LAST PAGES OF THIS BOOK FOR A HOW-TO GUIDE

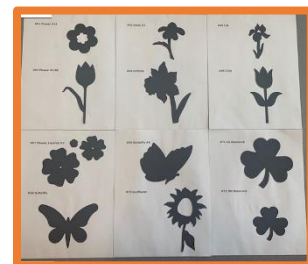

VISUAL GUIDE TO DIE CUTS

LRC-S STAFF HAVE CREATED A PICTURE REFERENCE TO HELP YOU DECIDE WHICH DIE CUTS ARE BEST SUITED TO YOUR PROJECT. VIEW THE VISUAL PHOTO GUIDES BELOW:

Open up a **Side Fold** for all sorts of possibilities. With Extra-Large dies, you can create memorable writing and shape books. Large dies give a brand new wrinkle to cards, invitations, stationery, mini reports, spelling booklets and more. Small dies are just right for creating gift tags.

1. For the **Side Fold**, use a piece of paper twice as wide as the die design to be cut. Fold the paper in half.

2. Lay the folded edge of the paper just inside the cutting rule on one side of the die to make the die-cut open like a card or booklet. Be sure the cutting rule extends beyond the edge of the fold.

3. Slide the die and paper into an Ellison® machine and cut.

To Make a Shape Book:
Die cut a colored sheet of paper plus several sheets of lined paper using the Side Fold technique. Attach using either staples, brads, string or ribbons.

Top Fold

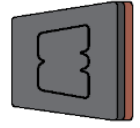

20616 - 4IN
Norepel Alphabet: Capital Letters 4"

Stay above the crease curve and try a **Top Fold**. With this fold, you can make eye-popping, three-dimensional bulletin boards, as well as stand-up cards and shapes to hang on like jutting fishing line or ribbon for banners or signs.

1. For the **Top Fold**, use a piece of paper twice as long as the die design to be cut. Fold the paper in half.

2. Lay the folded edge of the paper just inside the cutting rule of the top of the design. Be sure the cutting rule extends above the edge of the fold.

3. Slide the die and paper into an Ellison machine and cut. The result is a two-sided Ellison shape that will either stand on its own or hang.

Bottom Fold with Base

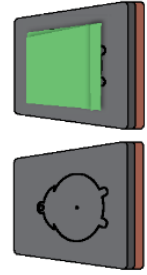

23679 - LG
Clock Face & Mirrors (Basic Beginnings)

From top to bottom, this **Bottom Fold with Base** creates a perfect stand-up centerpiece or individual place card. Use it for letters to practice spelling words or for easy identification exercises.

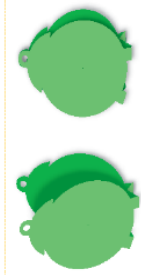

1. For the "Bottom Fold with Base," the paper needs to be twice as long as the die design to be cut, plus an additional inch. Fold the paper in half. At the folded end, fold back again about 1/2".

2. Lay the folded edge of the paper just inside the rule along the bottom of the die. The second fold needs to lay flat.

3. Slide the die and paper into an Ellison machine and cut.

4. Open the die-cut shape and re-fold so that the extra fold is now inside as a single accent piece. Use double-sided tape or glue to tightly fasten the top of the shape together. The shape will now stand on its own.

Stand-Up Fold

Organs Set (4 Die Set)

Any lesson comes to life with a **Stand-Up Fold**. This fold makes marvelous three-dimensional cards while transforming greetings, invitations, reports and any learning center.

1. For the **Stand-Up Fold**, measure width of desired shape. Add 1/2" to the measurement and multiply by four. This is how wide your paper should be. Fold the paper in half, then refold again, and then half again.

2. Open the folded paper and lightly number the backside of the folds 1 to 8. Accordion-fold the paper so that 4 and 5 are back-to-back, and 2 and 3, and so forth.

3. Adhere 4 and 5 together back-to-back, then 2 and 3, and 6 and 7. Leave 1 and 8 unglued.

4. Lay the folded paper flat with 3 and 4 on top. Die cut desired shape 3/4" from top of the paper.

5. To add an ornament, tie inside the negative shape, die cut a small shape twice and sandwich a piece of 3" white thread between the shapes. Tape the thread between fold 1 and 8 from the top of the card, making sure that the shape suspends at the center of the negative shape. Adhere 1 and 8 back-to-back. Stand the card on its four bottom edges.

Gatefold

18171 - LG
Ladybug #1

Swing open this **Gatefold** to find a little lesson inside. This unique format uses any die as a pull for a card or report and creates distinctive cards for any subject, holiday or special occasion.

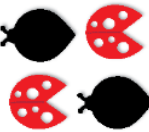

1. Fold both ends of a piece of paper so that they meet at the midpoint of the paper. This will make a Gatefold Card.

3. Embellish the two die-cuts. Place one on top of the other and fold in half vertically. This ensures alignment for attaching.

5. Align the other shape to make one complete shape on the right fold. Adhere to the inside of the right fold.

2. Die cut desired decorative shape twice. These shapes will become the card "pulls" or "handles."

4. Attach the folded back of one shape to the inside of the left fold.

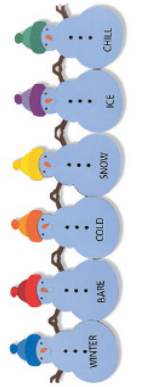

6. When the Gatefold Card is closed, the pulls that open the card come together to look like a complete shape.

Paper Dolls

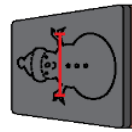

17969 - LG
Snowman, Country

For creating a beautiful border with any Ellison® die, **Paper Dolls** pull out all the stops. Use them to help easily unfold concepts such as math equations, sequencing, symmetry, party decorations or subject-related crowns for young children.

1. Start with a long strip of paper (or a roll) enough to cover the height of the chosen die.

2. Determine the width of the accordion fold by measuring the distance between outermost edges of the shape and making the width of the fold just inside the cutting rule on each side.

3. Accordion-fold the paper. Using the width measured as a guide. The material used will dictate how many layers can be cut.

4. Lay the folded paper on the die. The cutting rule should extend on either side of the folded paper where the shape is to connect. Keep folded paper edges inside but cutting rule edges. Slide the die and paper into an Ellison machine and cut.

Circular & Square Wreath

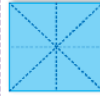

20584 - LG
Basic Beginnings Snowflake

21242 - LG
Basic Beginnings Dinosaur

Use any die to create fun wreaths for all occasions. A **Circular & Square Wreath** can create reports covers, demonstrate symmetry and decorate bulletin boards.

1. Start with a square piece of paper. Fold the square into one triangle. Then fold that triangle into another triangle, and fold that triangle into a third triangle folding in the same direction. The paper has now been folded into eighths.

2. Find the closed point of the folded triangle (the center point of the paper if opened).

Circular Wreath
See page 28 for shape & die.

Square Wreath
See page 28 for shape & die.

3. Circular Wreath: Place the closed point of the triangle on the bottom center of the shape extending past the cutting rule.*

Square Wreath: Place closed point toward bottom of the shape so that the folded paper is perpendicular to the die design (see picture).*

*Remember to keep folded paper edges to inside cutting rule edges.

The size of the wreath depends on where the triangle is placed on the die and the size of the design. Just remember that the closed point must be below the cutting rule.
