Data Source: NIOSH Employed Labor Force (ELF) [<https://wwwn.cdc.gov/wisards/cps/>]

Technical Notes:

- The CPS is a monthly probability sample of households in the United States (<https://www.bls.gov/cps/home.htm>). State specific data from the CPS are published through the Geographic Profile of Employment and Unemployment.
- Estimates exclude workers less than 16 years of age, active-duty members of the military, and people living in most group institutions (i.e., prisoners, living institutions for the elderly).
- Estimates from CPS published by the BLS may differ slightly compared to the CPS results obtained from ELF due to differences in methods used to apply population controls.
