PERMIT

<p>In accordance with the laws and regulations of the State of New Jersey, the Department of Environmental Protection hereby grants this permit to perform the activities described below. This permit is revocable with due cause and is subject to the limitations, terms and conditions listed below and on the attached pages. For the purpose of this document, "permit" means "approval, certification, registration, authorization, waiver, etc." Violation of any term, condition or limitation of this permit is a violation of the implementing rules and may subject the permittee to enforcement action.</p>		Approval Date JAN 07 2016
		Expiration Date JAN 06 2021
Permit Number(s): 1800-15-0004.1 FHA150001 1800-15-0004.1 FHA150002 1800-15-0004.1 FWW150001	Type of Approval(s): Flood Hazard Area Verification Flood Hazard Area Individual Permit Freshwater Wetlands Individual Wetlands Permit	Enabling Statute(s): NJSA 58:16A FHACA NJSA 13:9B FWPA NJSA 40:55D-93-99 WQPA
Permittee: New Jersey Department of Transportation c/o Tina Shutz 1035 Parkway Avenue, Trenton, NJ 08625		Site Location: Block(s) & Lot(s): [N/A, N/A] Municipality: Bridgewater and Bedminster Townships County: Somerset
Description of Authorized Activities: <p>The reconstruction of Interchange 21 between I-287 and I-78 and Interchange 22 between I- 287 and I-202/206. The interchange improvements are located in Bedminster and Bridgewater Townships, Somerset County. Activities authorized by this permit include the reconstruction of Ramp H from I-78 eastbound to I-287 northbound from a western acceleration lane into a reverse loop entering I-287 northbound on the eastern side, reconstructing Ramp E from I-287 northbound to I-78 eastbound 1000 feet south of the existing location, and the northward shift of Ramp SA from I-287 northbound onto I-202/206 southbound by approximately 200 feet. This permit also authorizes the widening of the Chambers Brook Culvert to accommodate the Ramp E reconstruction, a new culvert crossing over the Unnamed Tributary to the North Branch Raritan River, construction of dedicated auxiliary lanes for the reconstruction ramps on I-287 and I-202/20, and the construction of two new storm water basins.</p> <p>This Freshwater Wetlands Individual Permit authorizes the permanent disturbance of 3.456 acres to freshwater wetlands, 3.972 acres to freshwater wetland transition areas, and 0.028 of an acre to State open waters. This permit also authorizes the temporary impact of 0.050 of an acre to freshwater wetlands and 4.479 acres of freshwater wetland transition areas.</p>		
Prepared by:  _____ Matthew Resnick		Received and/or Recorded by County Clerk:
<p>THIS PERMIT IS NOT EFFECTIVE AND NO CONSTRUCTION APPROVED BY THIS PERMIT, OR OTHER REGULATED ACTIVITY, MAY BE UNDERTAKEN UNTIL THE APPLICANT HAS SATISFIED ALL PRE-CONSTRUCTION CONDITIONS AS SET</p>		
<p>This permit is not valid unless authorizing signature appears on the last page.</p>		

PRE-CONSTRUCTION CONDITIONS:

1. **Timing:** If this permit contains a condition that must be satisfied prior to the commencement of construction, the permittee must comply with such condition(s) within the time required by the permit or, if no time specific requirement is imposed, then within six months of the effective date of the permit, or provide evidence satisfactory to the Division that such condition(s) cannot be satisfied.

SPECIAL CONDITIONS:

1. **Recording of Permit:** This permit shall be recorded in its entirety in the office of the County Clerk or the Registrar of Deeds and Mortgages for each county where this project is located. Verified notice of this action shall be forwarded to the Division immediately thereafter. **NOTE:** The following information is to be submitted to the clerk for all Flood Hazard Area Verifications:
 - a. The Department file number for the verification;
 - b. The approval and expiration dates of the verification;
 - c. A metes and bounds description of any flood hazard area limit and/or floodway limit approved under the verification;
 - d. The flood hazard area design flood elevation, or range of elevations if variable, approved under the verification; and
 - e. The following statement: "The State of New Jersey has determined that all or a portion of this lot lies in a flood hazard area. Certain activities in flood hazard areas are regulated by the New Jersey Department of Environmental Protection and some activities may be prohibited on this site or may first require a permit. Contact the Division of Land Use Regulation at (609) 777-0454 for more information prior to any construction onsite."
2. **Material Disposal:** All excavated material and dredge material shall be disposed of in a lawful manner. The material shall be placed outside of any flood hazard area, riparian zone, regulated water, freshwater/coastal wetlands and adjacent transition area, and in such a way as to not interfere with the positive drainage of the receiving area.
3. In order to protect habitat for the federally listed Northern Long-eared Bat and Indiana Bat, the permittee shall adhere to a seasonal restriction on the clearing of trees with a diameter-at-breast-height of three-inches and greater from April 1 through July 31 of any calendar year.

CONDITIONS APPLICABLE FLOOD HAZARD AREAS

1. In order to protect general warm water game fish within Chambers Brook and the unnamed tributary to the North Branch Raritan River, no grading, construction or clearing is permitted within any watercourse onsite between May 1st and June 30th. Furthermore, any activity outside a watercourse, which would likely introduce sediment into the watercourse and/or increase its turbidity, is also prohibited during this period. The Department reserves the right to suspend all regulated activities onsite should it be determined that the applicant has not taken proper precautions to ensure continuous compliance with this condition. If coffer dams are constructed prior to the timing restrictions stated above, construction within the cofferdams may proceed during the restricted period(s).

2. De-watering of cofferdams must include properly sized temporary sediment basins or other filtering methods to reduce turbidity. The stream area to receive return water discharged from cofferdams must be encompassed by a turbidity barrier.
3. Raw, unset, or tremie concrete shall not come in contact with any surface waters onsite, since such contact can be toxic to aquatic biota.
4. Construction may only be performed in the dry or de-watered conditions. No work may be performed in the wet.
5. Construction equipment shall not be stored, staged or driven within any channel, freshwater wetland or transition area, unless expressly approved by this permit and/or described on the approved plans.
6. Vegetation within 50/150 feet of the top of the bank shall only be disturbed in the areas specifically shown on the approved drawing/s. No other vegetation within 50/150 feet of the top of any stream bank onsite shall be disturbed for any reason. This condition applies to all channels onsite regardless of the contributory drainage area.
7. Upon completion of the project, all temporarily disturbed areas within, 50/150 feet of the top of any stream bank onsite shall be restored to original topography and replanted with indigenous, non-invasive vegetation in accordance with N.J.A.C. 10.2(u).
8. This permit authorizes the permanent disturbance 20,105 SF (0.46 of an acres) to forested and shrub/scrub riparian zone vegetation for the reconstruction of Ramp E from I-287 northbound to I-78 eastbound over the Chambers Brook. This permit also authorizes the permanent disturbance of 17,526 SF (0.40 of an acre) to forested and shrub/scrub riparian zone vegetation and the temporary disturbance to 8,779 SF (0.20 of an acre) of temporary impacts to maintained herbaceous vegetation for the reconstruction and realignment of Ramp SA from I-287 northbound to I-202/206 southbound.
9. This permit verifies the flood hazard area design flood elevation at the location of proposed structures: the calculated Flood Hazard Area Design Flood Elevation ranges from 142.8 feet to 138.0 feet NAVD at the proposed Ramp E; the calculated Flood Hazard Area Design Flood Elevation ranges from 148.7 feet to 141.8 feet NAVD along I-287 NB (due to the overtopping from the unnamed tributary of Chambers Brook); the calculated Flood Hazard Area Design Flood Elevation ranges from 150.3 feet to 150.2 feet NAVD at the proposed Ramp SA. The floodway limits and the riparian zone limits onsite as shown on the approved plans
10. The Department has determined that this project is eligible for the linear development waiver of the Stormwater Management rules at N.J.A.C. 7:8-5.2(e). Any future expansion or alteration of the approved stormwater management system, which would affect water quality, increase the rate or volume of stormwater leaving the site, affect the infiltration capacity on the site, or alter the approved low impact site design, shall be reviewed and approved by the Department prior to construction. This includes any proposed changes to the discharge characteristics of any basin, the construction of new inlets or pipes that tie into the storm sewer network and/or the replacement of existing inlets or pipes with structures of different capacity.
11. The applicant shall make specific arrangements to ensure the continuous maintenance and efficient operation of all proposed stormwater management measures onsite. This includes the

inspection (and cleaning where necessary) of any and all constructed swales, basins, inlets at least four times per year and after every major storm totaling 1 inch of rainfall or more, the inspection and cleaning of all manufactured treatment devices per Department certification letters as found on www.njstormwater.org/treatment.html, and the use of appropriate soil conservation practices onsite, and any other reasonable effort required to maintain the stormwater management system in good working order.

CONDITIONS APPLICABLE TO FRESHWATER WETLANDS:

1. This Freshwater Wetlands Individual Permit authorizes the permanent disturbance of **3.456 acres** to freshwater wetlands, **3.972 acres** to freshwater wetland transition areas, and **0.028 of an acre** to State open waters. This permit also authorizes the temporary impact of **0.050 of an acre** to freshwater wetlands and **4.479 acres** of freshwater wetland transition areas. The wetlands affected by this permit authorization are of Intermediate resource value and the standard transition area or buffer required adjacent to these wetlands is 50 feet. This Individual Wetlands Permit includes a transition area waiver, which allows encroachment only in that portion of the transition area, which has been determined by the Department to be necessary to accomplish the regulated activities. Any additional regulated activities conducted within the standard transition area on-site shall require a separate transition area waiver from the Division. Regulated activities within a transition area are defined at N.J.A.C. 7:7A-2.6. Please refer to the Freshwater Wetlands Protection Act (N.J.S.A. 13:9B-1 et seq.) and implementing rules (N.J.A.C. 7:7A-1.1 et seq.) for additional information.
2. Any additional un-permitted disturbance of freshwater wetlands, State open waters and/or transition areas besides that shown on the approved plans shall be considered a violation of the Freshwater Wetlands Protection Act Rules unless the activity is exempt or a permit is obtained from the Department prior to the start of the proposed disturbance.
3. For any excavated area in freshwater wetlands, transition areas, and/or State open waters, the excavation shall be backfilled to the preexisting elevation, the uppermost 18 inches of the excavation shall be backfilled with the original topsoil material if feasible, the area above the excavation shall be replanted, in accordance with applicable BMPs, with indigenous wetlands species.
4. Any pipes laid through wetlands, transition areas, or State open waters shall be:
Properly sealed so as to prevent leaking or infiltration; Designed so as not to form a path for groundwater to be discharged or drained from the wetland; and placed entirely beneath the pre-existing ground elevation unless the applicant shows that placing some or all of the pipe above ground would be more environmentally beneficial.
5. This permit to conduct a regulated activity in a State open water includes the Division's approval of a Water Quality Certificate for these activities.

STANDARD CONDITIONS:

1. **Responsibilities:**
 - a. The permittee, its contractors and subcontractors shall comply with all conditions of this permit, authorizing and/or supporting documents and approved plans and drawings.
 - b. A copy of this permit, other authorizing documents, records and information including all approved plans and drawings shall be maintained at the authorized site at all times and made available to Department representatives or their designated agents upon request.

2. **Permit modification:** Plans and specifications in the application and conditions imposed by this permit shall remain in full force and effect so long as the proposed development or any portion thereof is in existence, unless modified by the Department. No change in plans or specifications upon which this permit is issued shall be made except with the prior written permission of the Department. The filing of a request to modify an issued permit by the permittee, or a notification of planned changes or anticipated noncompliance does not stay any condition of this permit.
3. **Duty to minimize environmental impacts:** The permittee shall take all reasonable steps to prevent, minimize or correct any adverse impact on the environment resulting from activities conducted pursuant to the permit, or from noncompliance with the permit. The permittee shall immediately inform the Department of any unanticipated adverse effects on the environment not described in the application or in the conditions of this permit. The Department may, upon discovery of such unanticipated adverse effects, and upon the failure of the permittee to submit a report thereon, notify the permittee of its intent to suspend the permit.
4. **Proper site maintenance:** While the regulated activities are being undertaken, neither the permittee, its contractors nor subcontractors shall cause or permit any unreasonable interference with the free flow of a regulated feature by placing or dumping any materials, equipment, debris or structures within or adjacent to the regulated area. Upon completion or abandonment of the work, the permittee, its contractors or subcontractors shall remove and dispose of in a lawful manner all excess materials, debris, equipment, silt fences and other temporary soil erosion and sediment control devices from all regulated areas. Only clean non-toxic fill shall be used where necessary.
5. **Sediment control:** Development which requires soil disturbance, creation of drainage structures, or changes in natural contours shall conduct operations in accordance with the latest revised version of "Standards for Soil Erosion Sediment Control in New Jersey," promulgated by the New Jersey State Soil Conservation Committee, pursuant to the Soil Erosion and Sediment Control Act of 1975, N.J.S.A. 4:24-42 et seq. and N.J.A.C. 2:90-1.3-1.14.
6. **Rights of the State:**
 - a. This permit does not convey any property rights of any sort, or any exclusive privilege.
 - b. Upon notification and presentation of credentials, the permittee shall allow Department representatives or their designated agents, to enter upon the project site and/or where records must be kept under the conditions of this permit, inspect at reasonable times any facilities, equipment, practices or operations regulated or required under the permit, and sample or monitor for the purposes of determining compliance. Failure to allow reasonable access shall be considered a violation of this permit and subject the permittee to enforcement action.
 - c. The issuance of this permit shall in no way expose the State of New Jersey or the Department to liability for the sufficiency or correctness of the design of any construction, structure or structures. Neither the State nor the Department shall, in any way, be liable for the loss of life or property which may occur by virtue of the activity of development resulting from any permit.
7. **Duty to Reapply:** If the permittee wishes to continue an activity covered by the permit after the expiration date of the permit authorization, the permittee must apply for and obtain a new permit authorization.

8. **Transfer of Permit:** This permit may not be transferable to any person unless the transfer is approved by the Department. Please refer to the applicable rules for more information.
9. **Other Approvals:** The permittee must obtain any and all other Federal, State and/or Local approvals. Authorization to undertake a regulated activity under this permit does not indicate that the activity also meets the requirements of any other rule, plan or ordinance.
10. **Noncompliance:**
 - a. Any noncompliance with this permit constitutes a violation, and is grounds for enforcement action, as well as modification, suspension and/or termination of the permit.
 - b. The permittee shall immediately report to the Department by telephone at (877) 927-6337 any noncompliance that may endanger health or the environment. In addition, the permittee shall report all noncompliance to Bureau of Coastal and Land Use Compliance and Enforcement, 401 E. State Street, 4th Floor, P.O. Box 420, Mail Code: 401-04C, Trenton, NJ 08625, in writing within five business days of the time the permittee becomes aware of the noncompliance. The written notice shall include: a description of the noncompliance and its cause; the period of noncompliance, including exact dates and times, and, if the noncompliance has not been corrected, the anticipated length of time it is expected to continue; and steps taken or planned to reduce, eliminate and prevent recurrence of the noncompliance. Such notice shall not, however, serve as a defense to enforcement action if the project is found to be in violation of this chapter.
11. **Appeal of Permit:** In accordance with the applicable regulations, any person who is aggrieved by this decision or any of the conditions of this permit may request a hearing within 30 days after notice of the decision is published in the DEP Bulletin. This request must include a completed copy of the Administrative Hearing Request Checklist. The DEP Bulletin is available through the Department's website at <http://www.nj.gov/dep/bulletin> and the Checklist is available through the Division's website at http://www.nj.gov/dep/landuse/download/lur_024.pdf. In addition to your hearing request, you may file a request with the Office of Dispute Resolution to engage in alternative dispute resolution. Please see the website www.nj.gov/dep/odr for more information about this process.

FRESHWATER MITIGATION PERMIT CONDITIONS BANK ONLY:

1. **Within 30 days of the issuance of this permit,** the permittee shall mitigate for the permanent loss of 0.136 acres of emergent, 0.265 acres of scrub/shrub and 3.055 acres of forested wetlands and 0.028 acres of State open waters through the purchase of 3.48 mitigation credits from an approved wetland mitigation bank.

At this time, the following bank(s) are approved to serve the project area; additional banks may be approved at any time, so please contact the Mitigation unit for the most up to date service area information if you would like additional options.

Cranbury Wetland Mitigation Bank – Contact Doug Lashley of GreenVest/Cranbury LLC at 410-987-5500 or at Doug@greenvestus.com

Wyckoff's Mills Wetland Mitigation Bank - Contact Ron Prann of Shaw Environmental & Infrastructure, Inc. at (609) 588-6345 or (609) 731-5400

2. **Within 60 days and prior to initiation of regulated activities**, the permittee shall submit proof of purchase for the amount of mitigation credits listed above to the attention of the Mitigation Unit Supervisor, NJDEP, Division of Land Use Regulation at Mail Code 501-02A, P.O. Box 420, Trenton, NJ 08625-0420.
3. In the event that mitigation credits are no longer available from the above referenced mitigation bank, the permittee shall contact the Division of Land Use Regulation, Mitigation Unit to arrange for an alternative mitigation option **prior to the initiation of regulated activities**.

RIPARIAN ZONE COMPENSATION CONDITIONS

1. The permittee shall compensate for the permanent disturbance to 0.445 acres of forested, 0.115 acres herbaceous riparian zone through an on-site project as shown on the plans entitled "Final Riparian mitigation Plan- I-287/I-78 I287/US202 206 Interchange Improvements Contract No. 020043890 " sheets 27-28 of 499, dated December 30, 2015, last revised 1/6/16 and prepared by Martin J. Maloney P.E.
2. **The compensation project must be conducted prior to or concurrent with the construction of the approved project.** Concurrent means that at any given time, the compensation must track at the same or greater percentage of completion as the project as a whole.
3. **Prior to the initiation of regulated activities authorized by this permit**, the permittee shall sign a Department approved conservation restriction to protect the compensation area from future development that would remove the vegetation planted. (N.J.A.C. 7:13-10.2(t)3) The conservation restriction shall conform to the format and content of the Riparian Zone Compensation Area model located at <http://www.nj.gov/dep/landuse/forms/index.html>. The restriction shall be included on the deed and recorded in the office of the County Clerk (the Registrar of Deeds and Mortgages in some counties) in the county wherein the lands of the compensation project are located. A metes and bounds description shown on a map must be included within the recorded conservation restriction. Within 10 days of filing the conservation restriction, the permittee must send a copy of the recorded conservation restriction to the attention of the Mitigation Unit Supervisor, NJDEP, Division of Land Use Regulation at Mail Code 501-02A, P.O. Box 420, Trenton, NJ 08625-0420.
4. The permittee shall monitor the riparian project for at least 3 years beginning the year after the riparian zone compensation project has been completed (N.J.A.C. 7:13-10.2(u)5). The permittee shall submit monitoring reports to the Division of Land Use Regulation, no later than December 31st of each full monitoring year.
 - a. All monitoring reports except the final one must include documentation and field data demonstrating that the goals of the riparian zone compensation project will be achieved as stated in the approved riparian zone compensation proposal and the permit requirements will be satisfied. If the permittee is finding problems with the compensation project and does not anticipate the site will be a full success, recommendations on how to rectify the problems shall be included in the report with a time frame in which they will be completed.
 - b. The final monitoring report must include documentation and data demonstrating the following:

- i. That the goals of the riparian zone compensation project as stated in the approved riparian zone compensation proposal and the permit conditions have been satisfied.
 - ii. That at least 85 percent of the compensation plantings have survived and that at least 85 percent of the compensation area is established with native species similar to ones identified on the compensation planting plan. All plant species in the compensation area must be healthy and thriving. All trees must be at least 5 feet in height; and
 - iii. That the site is less than 10 percent occupied by invasive or noxious species.
5. If the riparian compensation project does not meet the success criteria established above the project shall be considered a failure and the permittee shall submit a revised riparian compensation plan. The revised plan shall be submitted within 60 days of receipt of notification from the Division indicating the riparian compensation project was a failure.
 6. If the Division determines that the riparian zone compensation project is not constructed in conformance with the approved plan, the permittee will be notified in writing by the Department and will have 60 days to submit a proposal to indicate how the project will be corrected.

APPROVED PLANS:

Please approve the following drawings prepared by Martin Malony, of Parsons Brinkerhoff., certified and revised as noted below, collectively entitled;

“STATE OF NEW JERSEY, DEPARTMENT OF TRANSPORTATION, PLANS OF I-287/I-78 I-287/US 202 206, INTERCHANGE IMPROVEMENTS FRESHWATER WETLANDS INDIVIDUAL PERMIT, CONTRACT NO. 0200433890, BRIDGEWATER TOWNSHIP & BEDMINSTER TOWNSHIP, SOMERSET COUNTY”
