INTRODUCTION

The New Jersey Department of Transportation (NJDOT's) Electric Vehicle Infrastructure Deployment Plan (NJ Plan) supports the vision established by the Infrastructure Investment and Jobs Act, also known as the Bipartisan Infrastructure Law, and the Joint Office of Energy and Transportation (Joint Office) for a national charging network that is convenient, affordable, reliable, and equitable to enable a future where everyone can ride and drive electric.

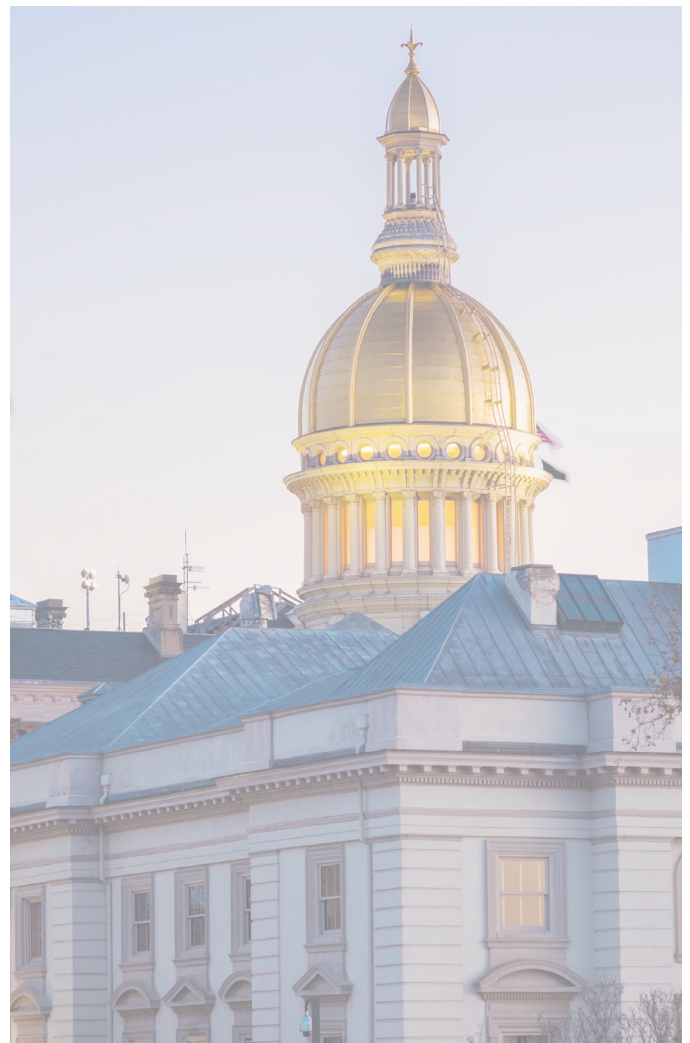

This Federal Fiscal Year (FFY) 2024 Plan Update will be submitted by August 2023. This Plan Update incorporates and identifies relevant additions and modifications made since the prior year's Plan approval, and provides updates required in specific Plan sections.

NJDOT has progressed the implementation of its electric vehicle infrastructure, since Plan approval on September 27, 2022, in several key areas including planning, outreach and contracting approach.

UPDATES FROM PRIOR PLAN

The following sections are updated in this Plan

- State Agency Coordination
- Public Engagement
- Plan Vision and Goals
- Contracting
- Existing and Future Conditions
- EV Charging Infrastructure Deployment
- Implementation
- Equity Considerations
- Labor and Workforce Considerations
- Physical Security and Cybersecurity
- Program Evaluation
- Discretionary Exceptions

STATE AGENCY COORDINATION

NJDOT continues to coordinate with neighboring states - New York, Pennsylvania, and Delaware - to ensure a coordinated network of EVSE in accordance with NEVI guidelines. The NJ Plan is updated To maximize opportunities to utilize U.S.-made EV supply equipment based on the updated Buy America provisions.

NEW JERSEY AGENCY COORDINATION

The interagency interaction of Team NJ remains. The experience and expertise of the Department of Environmental Protection, the Board of Public Utilities and Economic Development Authority continue to be crucial to effectively implementing EV charger infrastructure in New Jersey.

INTERAGENCY WORKING GROUP(S)

NJDOT has additionally collaborated as part of The Eastern Transportation Coalition (TETC) on approaches and best practices for electric vehicle infrastructure deployment. NJDOT has also coordinated with AASHTO and NASTO (the northeastern region of AASHTO).

PUBLIC ENGAGEMENT

NJDOT initiated a Request for Information (RFI) in December 2022 to January 2023 soliciting public engagement on EV charging infrastructure and receive industry feedback on NJ's Plan development. Notice was publicly posted, and specific invites included governmental entities, labor organizations, private sector/industry representatives of the transportation and freight logistics industries, state public transportation agencies, and environmental, equity and transportation advocacy groups. Two public interactive virtual outreach sessions were conducted on December 13 and 15, 2022.

PUBLIC
ENGAGEMENT**

PUBLIC ENGAGEMENT

COMMUNITY ENGAGEMENT OUTCOMES REPORT

Per 23 CFR 680.112 (d), community engagement outcomes include:

- Multiple outreach sessions in the development of the Plan, including environment, equity and transportation advocacy groups, public agencies, utilities, Electric Vehicle Supply/Service Equipment (EVSE) firms, Metropolitan Planning Organizations (MPOs) and Transportation Management Associations (TMAs).
- An RFI issued in December 2022 to January 2023 requesting feedback on the Plan including potential revenue opportunities, Plan approach to EVSE deployment and 17 industry specific questions designed to solicit valuable feedback for Plan enhancement and development.
- Two virtual public interactive sessions were conducted respectively on December 13th and December 15th, 2022, including a question-and-answer opportunity. A recording of each session was made publicly available for weeks through the NJDOT Procurement website.
- NJDOT is currently scheduling a Public Information Session to gain additional feedback and inform NJDOT's NEVI equity approach and desired outcomes.
- In 2019, NJ developed an Overburdened Communities mapping tool to assist in identifying and prioritizing communities that may benefit from electrification of the transportation sector. It is NJDOT's intent to enhance the Justice40 initiative with the NJ Overburdened Communities tool in the implementation of the Plan.

UTILITY ENGAGEMENT

New Jersey is recognized as a leader in developing utility readiness for EV charging infrastructure. The New Jersey Board of Public Utilities (NJBPU) has worked with each of NJ's major energy providers to provide make-ready incentives for EVSE, rebates for demand charges and power availability mapping tools. Additionally, NJBPU and the NJ Department of Environmental Protection (NJDEP) are encouraging utilities to create a pre-screen tool for capacity planning, including examining public capacity maps and completing a utility pre-screener, where a vendor gets a red, yellow, or green light for potential EV charging sites.

SITE-SPECIFIC PUBLIC ENGAGEMENT

NJDOT is currently scheduling a Public Information Session to gain additional feedback and to inform public of the Plan's equity approach and outcomes. Additionally, NJDOT intends to require the contractor to provide a Justice40 Plan including how the contractor will engage communities in the locations where EV charging infrastructure is installed.

PLAN VISION AND GOALS

The NJ Plan includes the approach to ensure the construction of or upgrading of existing direct current fast chargers (DCFCs) along the State's interstates, the New Jersey Turnpike, the Garden State Parkway, and the Atlantic City Expressway. Following the initial phase of contracting to achieve a fully built out network along New Jersey's interstates, the NJ Plan will address corridor charging needs based on outreach feedback. The Plan will outline a strategy to deploy electric vehicle charging infrastructure and establish an interconnected network which facilitates data collection that supports the development of convenient, accessible, reliable, and equitable EV charging. Contracts issued will include 1) data collection requirements, 2) a Justice40 plan focused on ensuring the benefits to disadvantaged and overburdened communities, and 3) installation, operations, community engagement plan and maintenance requirements to support charging network reliability. NJ's NEVI Formula Program supports the goals of NJ's Public Law 2019 Chapter 362 (also known as "NJ's EV Law") for at least 330,000 registered light duty vehicles being electric by December 31, 2025, and at least 2 million being electric by December 31, 2035. After achieving "fully built out" it is New Jersey's intent to provide corridor chargers every 25 miles along main roadways in accordance with NJ's EV Law. NJDOT also plans to include a revenue opportunity during the operations phase of the DCFC contract.

CONTRACTING

In December 2022, NJDOT issued an RFI to request industry feedback on an effective and efficient approach to implementing a statewide network of DCFCs along New Jersey's Alternative Fuel Corridor (AFCs). It is NJDOT's intent to issue an initial statewide contract for developing DCFCs along New Jersey's interstate highways including contracting with private entities and will include plans for the participation of small businesses as part of a Justice40 Plan. EV charging infrastructure will be delivered in an efficient and effective deployment by balancing the opportunity to develop EVSE in areas of high and low utilization in the same contract. Flexibility to choose DCFC sites along the AFCs zones, approximately 20 to 40 miles in length, will be specified in the contract; the option to construct new DCFC stations or upgrade existing charging sites will be included in the contract. To achieve efficient delivery of ongoing operations and maintenance activities during and after the period of the award, the contract will specify terms of operation and maintenance in accordance with NEVI requirements and also include enforcement clauses. Contractors will be required to provide a community engagement plan that specifies their commitment to outcomes that benefit the communities where their charging stations are installed. The community engagement plan will include local emergency response plans, developed in coordination with existing New Jersey Department of Community Affairs (NJDCA) trainings and standards, and in line with International Association of Fire Chiefs and National Fire Protection Association standards and practices, as needed.

STATUS OF CONTRACTING PROCESS

NJDOT issued a Request for Information in December 2022 to January 2023 soliciting feedback on the Plan including potential revenue opportunities, Plan approach to EVSE deployment and industry-specific questions designed to attain valuable feedback for Plan enhancement and development. NJDOT intends to issue a State-wide contract to provide DCFCs along AFC zones along New Jersey's interstate corridors as the initial contracting approach to achieve fully built out status.

AWARDED CONTRACTS

To date, no contract has been awarded. NJDOT intends to issue a State-wide contract to provide DCFCs along AFC zones on New Jersey's interstate corridors as the initial contracting approach to achieve fully built out status. NJDOT has established a Prequalification Category #44 – Electric Vehicle (EV) Charging Stations, available to all potential bidders for EVSE to be installed under this contract. To increase competition, contractors prequalified under the Prequalification Category #5 – Heavy Highway, may also be allowed to bid on this project. It is planned that the NEVI-compliant DCFC contract will be publicly and competitively bid and will be awarded to the lowest qualified bidder.

SCORING METHODOLOGIES UTILIZED

The NEVI-compliant DCFC contract will be publicly and competitively bid and will be awarded to the lowest qualified bidder. The contract will include the requirement that the contractor is to produce a Justice 40 plan demonstrating that 40% of the benefits flow to disadvantaged communities.

PLAN FOR COMPLIANCE WITH FEDERAL REQUIREMENTS

The contract will include provisions for compliance with 23 U.S.C., 23 CFR 680, and applicable requirements under 2 CFR 200.

CIVIL RIGHTS

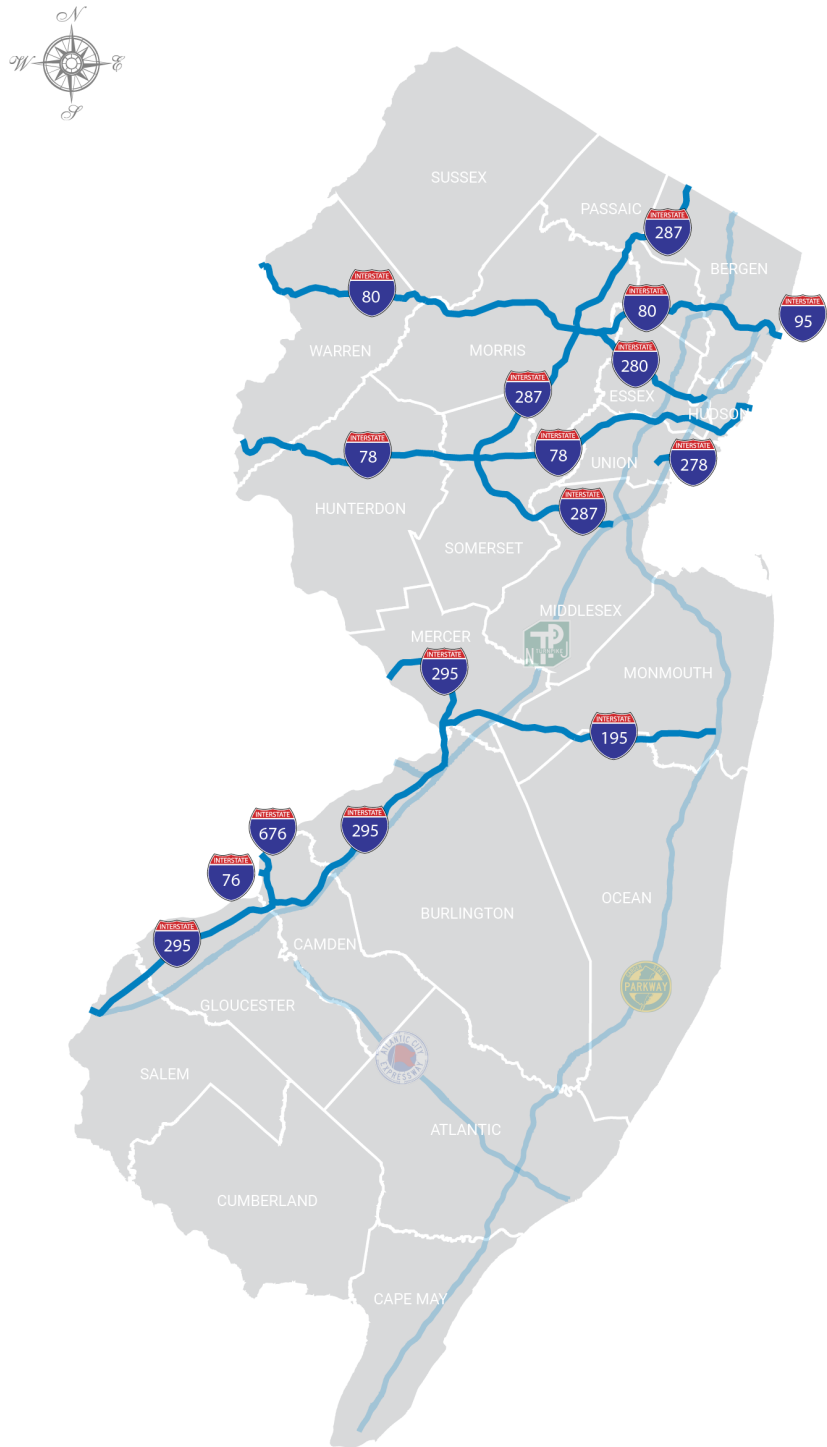

NJDOT will include in its contract for EV charging infrastructure the requirement to meet compliance with New Jersey and Federal civil rights laws, including Title VI of the Civil Rights Act and accompanying USDOT regulations, the American with Disabilities Act, Section 504 of the Rehabilitation Act, and compliance with minimum standards for EV charging infrastructure under 23 CFR 680.

EXISTING AND FUTURE CONDITIONS ANALYSIS

This section has been updated to indicate existing EV charging infrastructure in New Jersey.

ALTERNATIVE FUEL CORRIDOR (AFCs) DESIGNATIONS

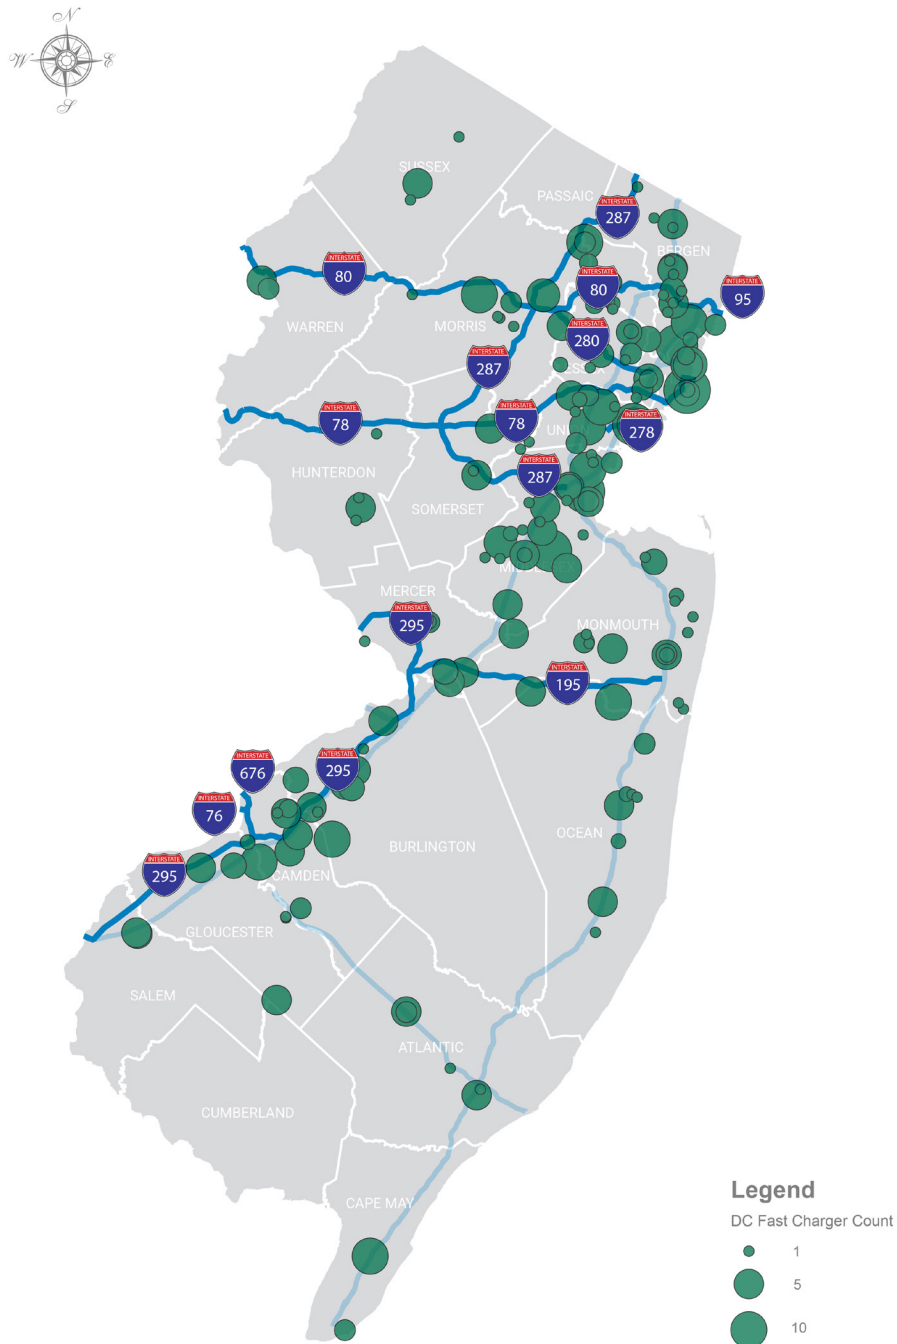

As of Round 6, New Jersey has nominated all interstates, the NJ Turnpike, the Garden State Parkway, and the Atlantic City Expressway as AFCs.

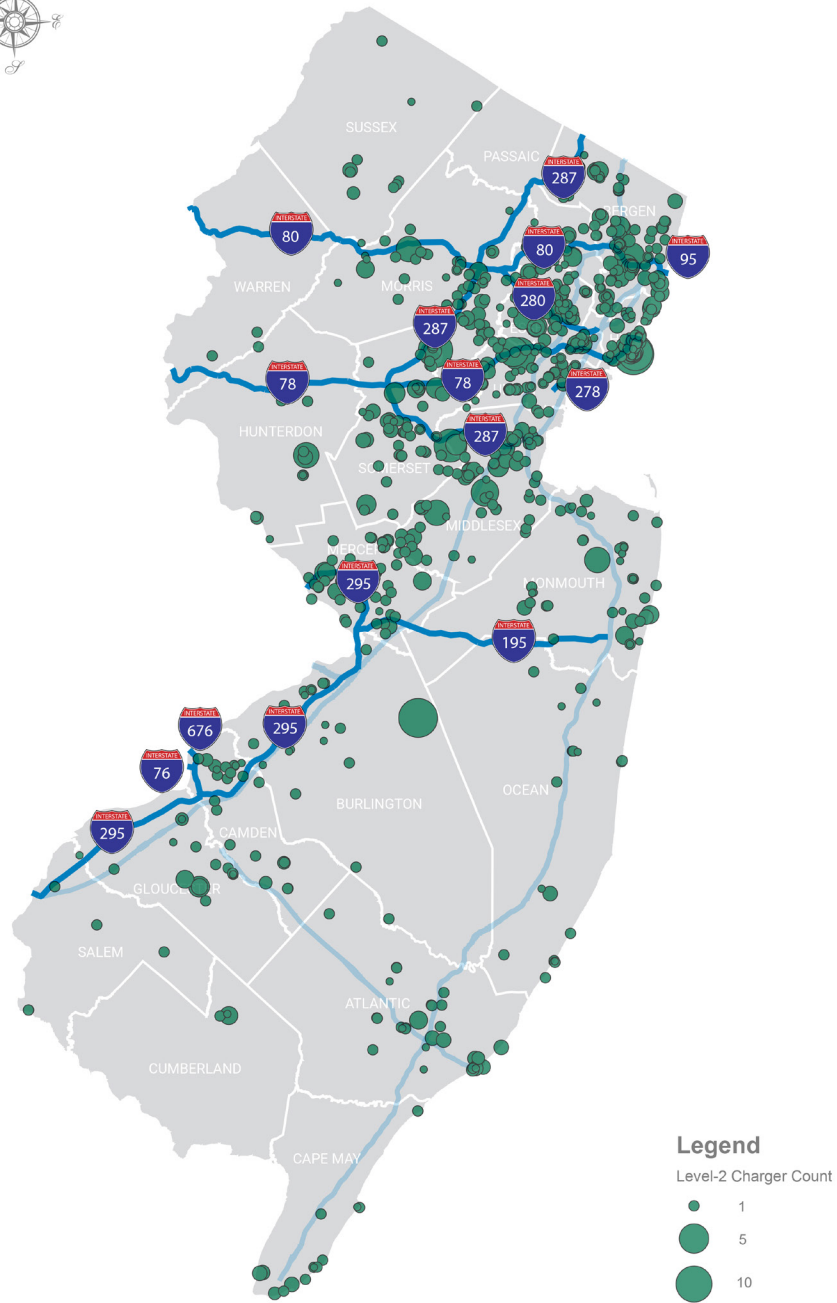

EXISTING AND FUTURE CONDITIONS ANALYSIS

EXISTING CHARGING STATIONS

Based on data as of 07/21/2023 from NJDEP, there are 1,950 publicly accessible Level 2 ports and 904 DCFC ports in New Jersey¹. Graphics below indicate approximate locations for these charging ports. For existing charger locations and information see Appendix A.

1. <https://atlaspolicy.com/evaluatenj/>

MAP OF NEW JERSEY LEVEL 2 CHARGERS

EV CHARGING INFRASTRUCTURE DEPLOYMENT

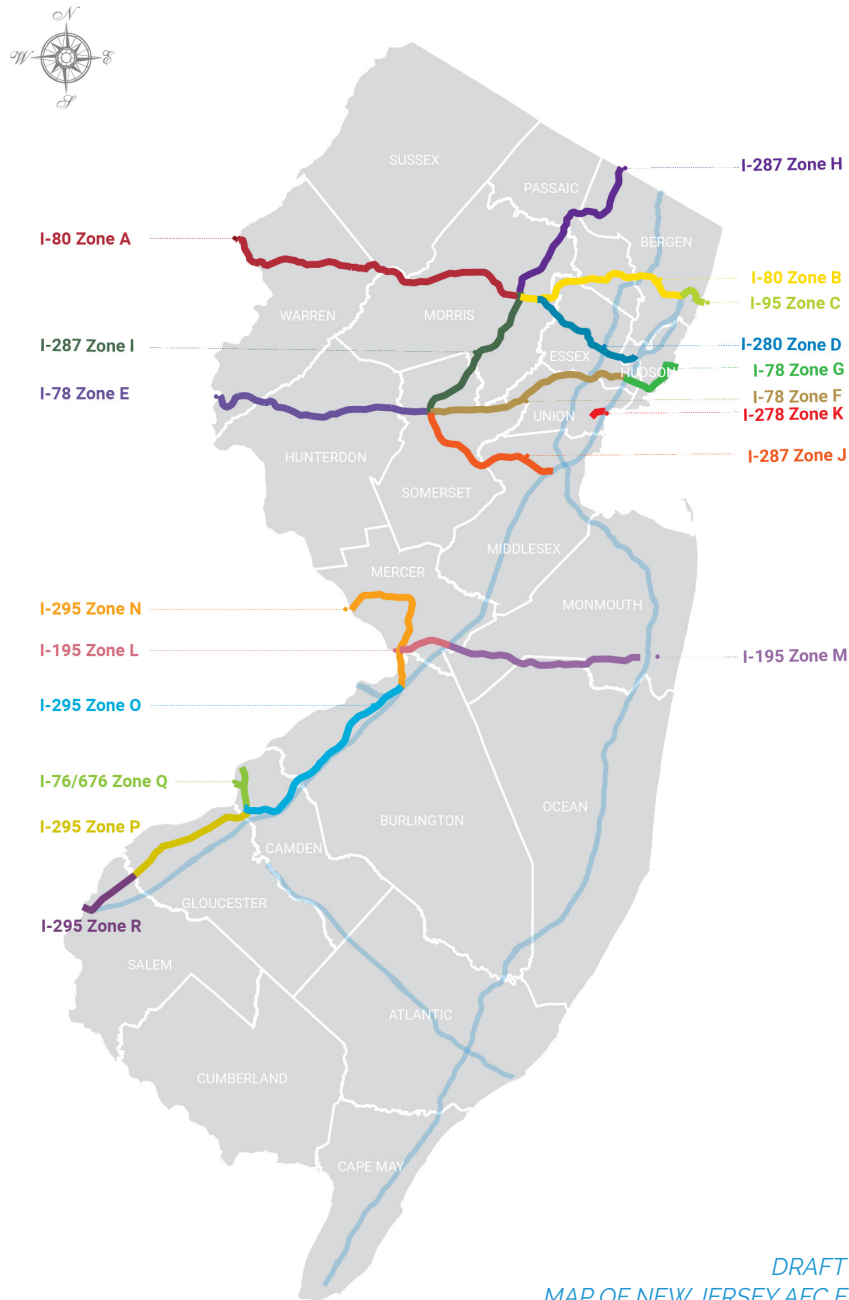

NJDOT's Deployment Plan focuses on establishing zones along the interstate highways that will comply with the NEVI required 50-mile spacing between DCFCs for those AFCs that are longer than 50 miles. These AFCs include interstates I-78, I-80, I-287 and, I-295. Build out of DCFCs along the New Jersey Turnpike and Garden State Parkway will be accomplished by the New Jersey Turnpike Authority; this includes the section of the NJ Turnpike signed as I-95. The Atlantic City Expressway has DCFCs established by the South Jersey Transportation Authority. New Jersey has several AFCs less than 50 miles in length; it is the intent to establish under the NEVI program DCFCs along I-280 and I-195. Very short length roadways including I-76, I-676, and I-278 will be reviewed for opportunities to utilize nearby existing or planned DCFCs for practical access to convenient equitable charging; some locations may be submitted for discretionary exceptions.

It is NJDOT's intent that NEVI funding provides for no more than 80% of the total eligible costs, and that no more than 90% of the eligible costs be funded by publicly attained sources including utility rebates and incentives, NEVI funds, and other public funding sources. Operations cost may be an allowable component of the contractor's bid, and NJDOT is exploring options to incentivize operation in low utilization areas. NJDOT will seek a revenue-generating opportunity during the operations phase of the program. To facilitate EVSE build out, NJ's Department of Community Affairs (DCA) has issued the DCA Model Statewide Municipal EV Ordinance which designates EVSE and Make-Ready parking spaces as a permitted accessory use in all zoning or use districts. It is anticipated that DCFC stations will be constructed in local townships and municipalities and that the local ordinances applicable to a private development shall apply; it will be the contractor's responsibility to coordinate local building compliance efforts with the township or municipality. The contractor will be responsible for submitting a plan assuring compliance with all codes and standards.

PLANNED CHARGING STATIONS

At each AFC location zone it will be specified that all charger stations shall meet NEVI requirements including the following:

- (4) 150kW Chargers with Combined Charging System (CCS) Ports
- Simultaneous Charging at 4 Ports
- 24/7/365 Public Access
- Payment Options per NEVI
- Meets Accessibility Requirements
- Meets Uptime Requirements
- Joint Office and New Jersey Data Sharing Requirements

*DRAFT FOR PLANNING PURPOSES
MAP OF NEW JERSEY AFC EVSE DEVELOPMENT ZONES*

NJDOT has identified zones along NJ's interstate AFCs for DCFC development. The AFC zones are found in the above graphic and represent an opportunity for effective EVSE development for potential sites to be economic and equitable. Locations of these zones is designed to promote equitable access throughout the State's AFCs. NJDOT intends to issue one statewide contract to cover all zones for EVSE development, including the responsibility for the five years of operations and maintenance at each EVSE site in accordance with NEVI requirements. The contractor shall have the option of upgrading an existing EVSE site to meet NEVI standards at each AFC zone; it is expected that upgrades to existing EVSE stations may be accomplished within 18 months, and that new EVSE stations will be constructed in approximately 18-24 months. Anticipated durations may be significantly affected by supply chain issues and subject to revised timeframes.

Appendix B contains preliminary information regarding planned locations for DCFC development. Additional Information will be available upon award of a contract for EVSE development in each AFC zone and will be provided in the next Plan update.

PLANNING TOWARDS A FULLY BUILT OUT DETERMINATION

It is anticipated that approximately 18 DCFC stations may need to be constructed, or existing stations upgraded, to achieve fully built out status along the interstates in New Jersey. It is estimated that between 12 and 20 DCFC stations may need to be built, or existing stations upgraded, along the non-interstate AFCs in New Jersey.

IMPLEMENTATION

The implementation approach in the approved plan remains the same. NJDOT will require the contractor to be responsible for installation, maintenance, and ownership responsibilities for the charging infrastructure. Implementation requirements will be updated to include the most current changes to address compliance with minimum standards for EV charging infrastructure under 23 CFR 680 and the most current FHWA NEVI guidance.

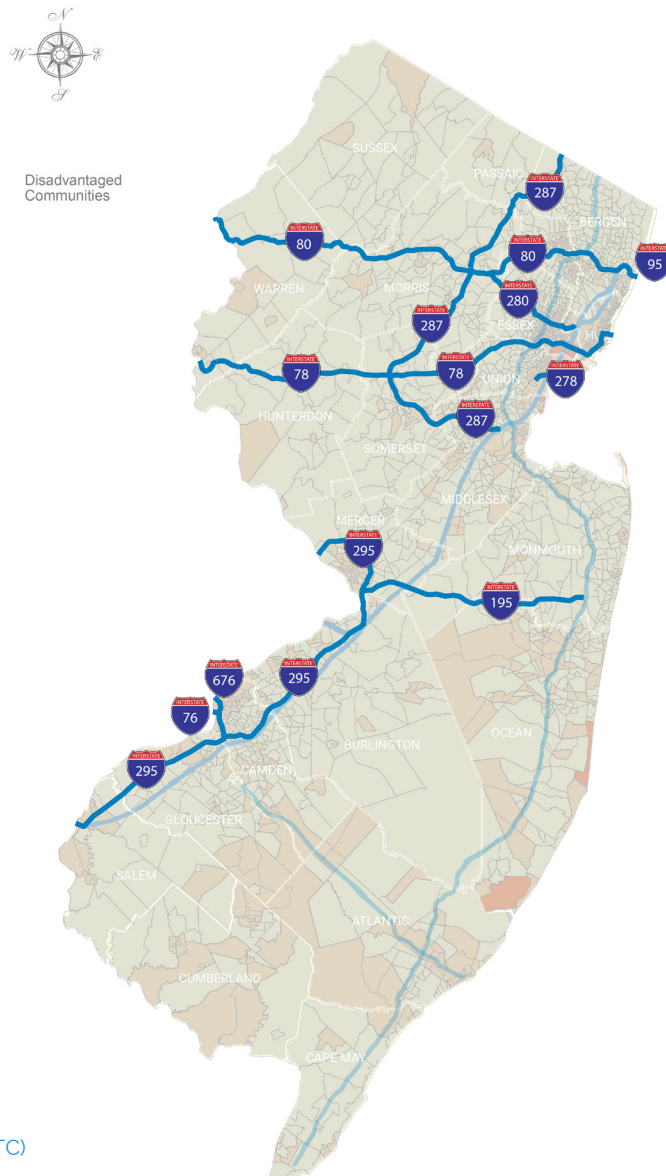

EQUITY CONSIDERATIONS

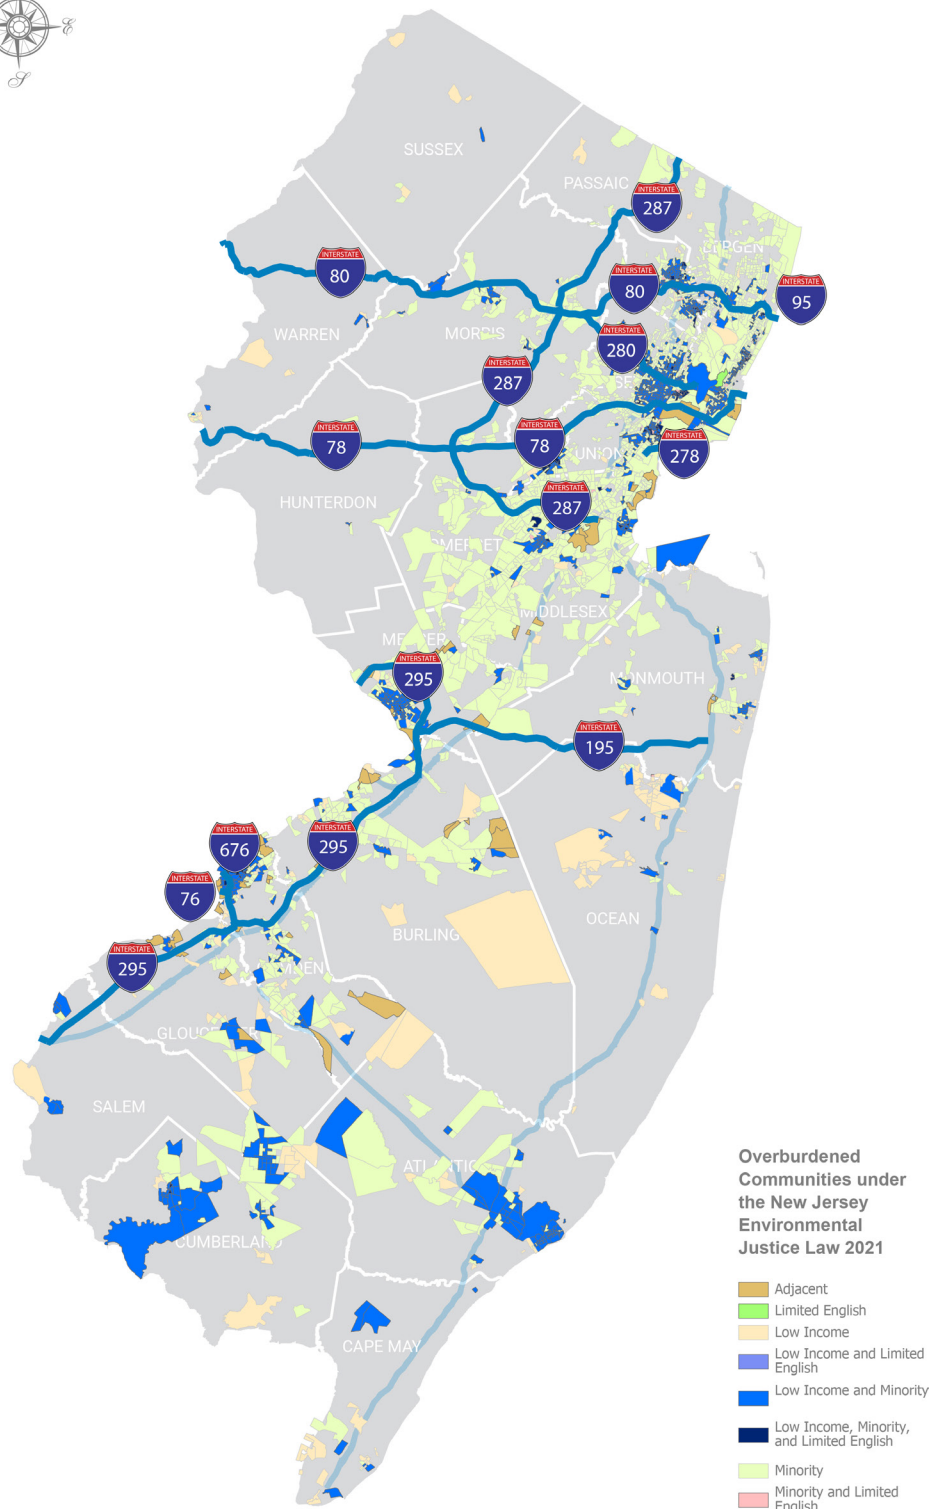

It is NJDOT's intent to specify that approximately 40% of the DCFC sites chosen by the contractor be in or within 1 mile of a Disadvantaged Community (DAC) as specified and determined by the Equitable Transportation Community (ETC) Explorer Justice40 mapping tools and New Jersey's Overburdened Community (OBC) mapping tool. Also, the contract will include provisions for the contractor to submit a Justice40 plan specifying the initiatives and metrics to demonstrate that 40% of the benefits of the program flow to DACs and OBCs.

IDENTIFICATION AND OUTREACH TO DISADVANTAGED COMMUNITIES (DACs) IN THE STATE

NJDOT is currently scheduling a Public Information Session to gain additional feedback to inform the Plan's equity approach and outcomes. NJDOT intends to require the contractor to provide a Justice40 Plan including how the contractor will engage communities in the locations where EV charging infrastructure is installed.

SOURCE: USDOT EQUITABLE TRANSPORTATION COMMUNITY (ETC) EXPLORER TOOL

MAP OF NJ OVERBURDENED COMMUNITIES

PROCESS TO IDENTIFY, QUANTIFY, AND MEASURE BENEFITS TO DACS

Utilizing the Argonne National Laboratory's Electric Vehicle Charging Equity Considerations, the Electric Vehicle Charging Justice40 Map tool, and New Jersey's OBC mapping tool, the following strategies will be used to measure benefits, and the data sources and analysis methods used to track metrics. Community engagement will be a source of establishing feedback for setting goals and establishing baselines for benefits.

| Benefits Category (examples) | Strategy for Tracking Benefits (Metrics, Baseline, Goals, Data Collection & Analysis Approach, Community Validation) |
|---|---|
| Improve clean transportation access through the location of chargers; | NJDOT's intent is to locate a significant number of DCFCs in and near disadvantaged communities. |
| Decrease the transportation energy cost burden by enabling reliable access to affordable charging; | Consideration for certain operating costs at locations where initial lower utilization is expected may be incorporated into the NEVI procurement opportunity |
| Reduce environmental exposures to transportation emissions; | Locating EVSE along AFCs will enhance adoption of EVs, with the correlating environmental benefits; measures may include recording EVSE usage and increases in EV registrations. |
| Increase parity in clean energy technology access and adoption; | EVSE contractors will be responsible for partnering with NJDOT, in collaboration with other State agencies as appropriate, to promote awareness, education, community involvement and access to EV and EVSE technology. |
| Increase access to low-cost capital to increase equitable adoption of more costly, clean energy technologies like EVs and EV chargers; | EVSE contractors will be encouraged to take advantage of co-lending opportunities offered by the New Jersey Economic Development Authority (NJEDA). The New Jersey Board of Public Utilities (NJBPU) has instituted a program for make-ready incentives and demand charge rebates with all major utility providers in NJ. |
| Increase the clean energy job pipeline, job training, and enterprise creation in disadvantaged communities; Increase energy resilience; | EVSE contractors will be required to provide a workforce development plan, emphasizing the continuing pipeline of skilled workers to support EVSE installation, operations and maintenance, and opportunities to disadvantaged communities. |
| Provide charging infrastructure for transit and shared-ride vehicles; | Opportunities for infrastructure for transit and shared ride vehicles will be outcomes from community outreach sessions along with NJ transit coordination and will inform updates to the Justice40 approaches. |
| Increase equitable access to the electric grid; | NJBPU/NJDEP are working with the utility providers to develop tools that assist in the effective assessment of sites for EVSE development. Development of EVSE throughout rural and dense urban areas of NJ is a goal to ensure equitable access. |
| Minimize gentrification-induced displacement resulting from new EV charging infrastructure. | Following outreach sessions, EVSE development in communities will be informed by community concerns about gentrification. |

LABOR AND WORKFORCE CONSIDERATIONS

NJDOT has established a prequalified category for the construction of EVSE including provisions that the electrical work must be performed by NJ licensed electricians. Workforce training will be included as part of the contractor's Justice40 plan requirements. The contractor shall outline in their Justice40 plan their approach to training, experience level and diversity of the workforce installing and maintaining EV charging infrastructure. At a minimum, the contract will require compliance with Federal and State Equal Employment Opportunity provisions, and that the workforce installing, maintaining, and operating chargers has appropriate licenses, certifications, and trainings in compliance with CFR 680.106(j)

In compliance with 23 CFR 680.106(j) to ensure that the installation and maintenance of chargers is performed safely by a qualified and increasingly diverse workforce of licensed technicians and other laborers, all electricians installing, operating, or maintaining Electric Vehicle Supply Equipment must receive certification from the Electric Vehicle Infrastructure Training Program (EVITP) or a registered apprenticeship program for electricians that includes charger-specific training developed as part of a national guideline standard approved by the Department of Labor in consultation with the Department of Transportation; additional apprenticeship and/or training programs shall only be utilized in place of the EVITP if and when such programs are approved by the Department of Labor per the 23 CFR 680.106(j).

PHYSICAL SECURITY & CYBERSECURITY

The NJDOT contract will address physical security and cybersecurity of EV charging stations, including compliance with minimum standards for EV charging infrastructure under 23 CFR 680, and New Jersey specific criteria.

PROGRAM EVALUATION

NJDOT will monitor and report progress of the overall statewide Electric Vehicle AFC network and update this plan annually to address opportunities for improvement. Future plan updates will provide a summary and assessment of the performance of EV chargers based on data submitted to the Joint Office in compliance with 23 CFR 680.112 (see Section V-B in the NEVI Formula Program Guidance).

DISCRETIONARY EXCEPTIONS

NJDOT may seek discretionary exceptions for interstates I-76, I-676, and I-278. Each of these roadways is less than 5 miles in length in NJ and may not offer a viable effective, efficient, and equitable opportunity for DCFC station buildout.

APPENDIX A: SUPPORTING MATERIALS

The table below contains information as of 6/30/2023 from the US Department of Energy's Alternative Fuels Data Center with specific site details for Level 2 and DCFCs in New Jersey. Available at: <https://afdc.energy.gov/>

Existing charging stations have not been reviewed for compliance with the NEVI Program Guidance (Update) Memorandum dated 6/2/2023. To achieve Fully Built Out, upgrading existing charging stations will be an option. The following information will be added to future Plan Updates as information becomes known:

- Meets relevant requirements in 23 CFR 680
- Intent to count towards Fully Built Out determination

| State EV Charging Location Unique ID | Charger Level (L2) | Charger Level (DCFC) | Location (Street Address) | Number of L2 Ports | Number of DCFC Ports | EV Network (if known) |
|--------------------------------------|--------------------|----------------------|--|--------------------|----------------------|-----------------------|

APPENDIX B: SUPPORTING MATERIALS

The table in this appendix contains preliminary planning information that may be updated.

New Jersey DOT
NEVI Zones along AFCs for DCFC Development
(1 DCFC to be developed per Zone)

| ZONE | Route | Start Mile Post (MP) | End MP | DCFC | Length (in Miles) | Interchanges Potentially Available for DCFC Development |
|------|-------|----------------------|--------------|--------------|-------------------|---|
| A | 80 | 0 | 43.62, 43.67 | 1 | 43.67 | Up to 18 |
| B | 80 | 43.62, 43.67 | 68.35 | 1 | 24.68 | Up to 21 |
| C | 95 | 73.46 | 77.96 | 1 | 4.5 | Up to 4 |
| D | 280 | 0.00 | 17.25, 17.49 | 1 | 17.49 | Up to 16 |
| E | 78 | 0.00 | 30.8, 30.87 | 1 | 30.87 | Up to 14 |
| F | 78 | 30.8, 30.87 | 58.90 | 1 | 28.03 | Up to 18 |
| G | 78 | 58.9 | 67.83 | 1 | 8.93 | Up to 2 |
| H | 287 | 42.02 | 67.54 | 1 | 25.52 | Up to 12 |
| I | 287 | 21.17 | 42.02 | 1 | 20.85 | Up to 11 |
| J | 287 | 0.00 | 21.17 | 1 | 21.17 | Up to 15 |
| K | 278 | 0.00 | 2.07 | 1 | 2.07 | Up to 3 |
| L | 195 | 0.00 | 6.85 | 1 | 6.85 | Up to 5 |
| M | 195 | 6.85 | 34.17 | 1 | 27.32 | Up to 9 |
| N | 295 | 53.31 | 76.56 | 1 | 23.25 | Up to 16 |
| O | 295 | 27.1 | 53.31 | 1 | 26.21 | Up to 13 |
| P | 295 | 8.93 | 27.1 | 1 | 18.17 | Up to 15 |
| Q | 76 | 0.00 | 4.72 | 1 | 4.72 | Up to 2 |
| Q | 676 | 0.43 | 3.09 | incl w/ I-76 | 2.66 | Up to 5 |
| R | 295 | 0.00 | 8.93 | 1 | 8.93 | Up to 4 |

| | | |
|----------|--------|-----------|
| 18 DCFCs | 345.89 | Up to 203 |
|----------|--------|-----------|
