## PERMIT

<p>In accordance with the laws and regulations of the State of New Jersey, the Department of Environmental Protection hereby grants this permit to perform the activities described below. This permit is revocable with due cause and is subject to the terms, conditions, and limitations listed below and on the attached pages. For the purpose of this document, "permit" means "approval, certification, registration, authorization, waiver, etc." Violation of any term, condition, or limitation of this permit is a violation of the implementing rules and may subject the permittee to enforcement action.</p>		Approval Date <b>March 11, 2021</b>
		Expiration Date <b>March 10, 2026</b>
Permit Number(s): 0000-20-0026.1 LUP200001	Type of Approval(s): FHA Individual Permit FWW Individual Permit Water Quality Certificate	Governing Rule(s): N.J.A.C. 7:13-1.1(b) N.J.A.C. 7:7A-1.1(a)
Permittee: NJDOT c/o Brenna Fairfax 1035 Parkway Ave Trenton, NJ 08625	Site Location: Block(s) & Lot(s): [N/A, N/A] [N/A, N/A] [N/A, N/A] Municipality: Pennsauken, Cherry Hill, Evesham Townships County: Camden, Burlington	
<p><b>Description of Authorized Activities:</b></p> <p>This document authorizes improvements to Route 70, between Route 38 (MP 0.0) to Cooper Avenue (MP 8.8) including milling and resurfacing, full depth reconstruction at specific locations along the roadway, the reconstruction of three existing culverts, the reconstruction of four existing outfalls, the construction of six new stormwater basins, drainage improvements, new sign and intelligent traffic signals, and ADA compliance upgrades in Pennsauken, Cherry Hill, and Evesham Townships, Camden and Burlington County.</p> <p><i>The Department has determined that the herein approved activities meet the requirements of the (FHACA/CZM) rules. This approval does not obviate the local Floodplain Administrator's responsibility to ensure all development occurring within their community's Special Flood Hazard Area is compliant with the local Flood Damage Prevention Ordinance, and minimum NFIP standards, regardless of any state-issued permits. FEMA requires communities to review and permit all proposed construction or other development within their SFHA in order to participate in the NFIP.</i></p>		
Prepared by:  Matthew Resnick	Received and/or Recorded by County Clerk:	
<p>If the permittee undertakes any regulated activity, project, or development authorized under this permit, such action shall constitute the permittee's acceptance of the permit in its entirety as well as the permittee's agreement to abide by the requirements of the permit and all conditions therein.</p>		
<p><b>This permit is not valid unless authorizing signature appears on the last page.</b></p>		

**STATEMENT OF AUTHORIZED IMPACTS:**

The authorized activities allow for the permittee to undertake impacts to regulated areas as described below. Additional impacts to regulated areas without prior Department approval shall constitute a violation of the rules under which this document is issued and may subject the permittee and/or property owner to enforcement action, pursuant to N.J.A.C. 7:13-21.8; N.J.A.C. 7:7A-19.11.

<b>FWW Individual Permit-Wetlands (not SFH/Duplex)</b>	<b>Permanent Disturbance (Acres)</b>	<b>Temporary Disturbance (Acres)</b>
<b>Freshwater wetlands</b>	0.022	0.002
<b>Transition areas</b>	0.318	0.038
<b>State open waters</b>	0.019	0.058

<b>Riparian Zone Vegetation</b>	<b>Area of riparian zone (Acres)</b>
<b>Permanent Disturbed</b>	0.521
<b>Temporary Disturbed</b>	0.072

**PRE-CONSTRUCTION CONDITIONS:**

1. All sediment barriers and other soil erosion control measures shall be installed prior to commencing any clearing, grading or construction onsite, and shall be maintained in proper working condition throughout the entire duration of the project
2. Construction equipment shall not be stored, staged or driven within any channel, freshwater wetland or transition area, unless expressly approved by this permit and/or described on the approved plans.
3. De-watering of cofferdams must include properly sized temporary sediment basins or other filtering methods to reduce turbidity. The stream area to receive return water discharged from cofferdams must be encompassed by a turbidity barrier. The turbidity barrier must be located parallel to the stream banks and anchored to the shoreline to maintain free flow of the stream center. In order to avoid obstruction of stream flows or fish passage, turbidity barriers must not be placed across the entire stream channel.

**STATE HISTORIC PRESERVATION CONDITIONS:**

1. The applicant shall consult with the Historic Preservation Office (HPO) regarding the outfall structures located within the Cooper River Park Historic District which is listed on the New Jersey and National Registers of Historic Places. The applicant shall ensure that the outfall structure's materials, color, and finishes are in accordance with the Secretary of the Interior's *Standards for the Treatment of Historic Properties* pursuant to NJAC 7:7A-5.7(b)(5). The consultation with the HPO shall be concluded within 60-days of permit issuance or mutually agreed upon time frame.

**FLOOD HAZARD AREA SPECIAL CONDITIONS:**

1. All excavated material and dredged material shall be disposed of in a lawful manner outside of any flood hazard area riparian zone, open water, freshwater wetland and adjacent transition area, and in such a way as to not interfere with the positive drainage of the receiving area.
2. In order to protect warm water general game fish species within Chandler's Run, Cropwell's Brook, Cooper River UNT, Cooper River, and Cropwell's Branch, no grading, construction or clearing is permitted within the river between May 1<sup>st</sup> through June 30<sup>th</sup> of each calendar year. Furthermore, any activity outside the river, which would likely introduce sediment into the rivers and/or increase its turbidity, is also prohibited during this period. The Department reserves the right to suspend all regulated activities onsite should it be determined that the permittee has not taken proper precautions to ensure continuous compliance with this condition. If sediment control structures are installed prior to the timing restrictions stated above, construction behind the sediment control structures may proceed during the restricted period.
3. In order to protect migratory anadromous fish species within South Branch Pennsauken Creek, no grading, construction or clearing is permitted within the river between April 1<sup>st</sup> through June 30<sup>th</sup> of each calendar year. Furthermore, any activity outside the river, which would likely introduce sediment into the rivers and/or increase its turbidity, is also prohibited during this period. The Department reserves the right to suspend all regulated activities onsite should it be determined that the permittee has not taken proper precautions to ensure continuous compliance with this condition. If sediment control structures are installed prior to the timing restrictions stated above, construction behind the sediment control structures may proceed during the restricted period.
4. The Department has determined that this project is eligible for the linear development waiver of the Stormwater Management rules at N.J.A.C. 7:8-5.2(e). Any future expansion or alteration of the approved stormwater management system, which would affect water quality, increase the rate or volume of stormwater leaving the site, affect the infiltration capacity on the site, or alter the approved low impact site design, shall be reviewed and approved by the Department prior to construction. This includes any proposed changes to the discharge characteristics of any basin, the construction of new inlets or pipes that tie into the storm sewer network and/or the replacement of existing inlets or pipes with structures of different capacity.
5. Construction may only be performed in the dry or de-watered conditions. No work may be performed in the wet.
6. The regulated activities shall not expose unset, raw or tremie cement to flowing water within any channel or regulated water during construction, since such contact can be toxic to aquatic biota.
7. Vegetation within 50/300 feet of the top of the bank shall only be disturbed in the areas specifically shown on the approved drawing(s). No other vegetation within 50/ 300 feet of the top of any stream bank onsite shall be disturbed for any reason. This condition applies to all channels onsite regardless of the contributory drainage area.
8. All riparian zone vegetation that is cleared, cut, and/or removed to conduct a regulated activity, access an area where regulated activities will be conducted, or otherwise accommodate a regulated activity shall be replanted immediately after completion of the regulated activity, unless prevented by seasonal weather, in which case the vegetation shall be replanted as soon as conditions permit.

Portions of the riparian zone occupied by an authorized structure need not be replanted. The vegetation to be replanted shall:

- i. Consist of vegetation of equal or greater ecological function and value as the vegetation that was cleared, cut, or removed. For example, herbaceous vegetation may be replaced with the same type of vegetation or with trees, but the trees in forested areas must be replaced with trees of equal or greater density and ecological function and value;
- ii. Consist of native, non-invasive vegetation, except in an actively disturbed area. In an actively disturbed area, the vegetation may be replaced with the same type of vegetation that was cleared, cut, or removed, or with another kind of vegetation typical of an actively disturbed area. For example, lawn grass may be replaced with garden plants or agricultural crops; and
- iii. In cases where replanting would interfere with continued access to or maintenance of a structure that is required by Federal, State, or local law, the vegetation replanted shall meet the requirements to the extent feasible.

#### **FRESHWATER WETLANDS SPECIAL CONDITIONS:**

1. Any additional un-permitted disturbance of freshwater wetlands, State open waters and/or transition areas besides that shown on the approved plans shall be considered a violation of the Freshwater Wetlands Protection Act Rules unless the activity is exempt or a permit is obtained from the Department prior to the start of the proposed disturbance.
2. Any pipes laid through wetlands, transition areas, or State open water must be properly sealed so as to prevent leaking or infiltration. Pipes and backfilled materials must be placed entirely beneath the pre-existing ground elevation.
3. The excavation within the wetlands and transition area must be backfilled with the original soil material or suitable material to within 18 inches of the surface. The upper 18 inches must be backfilled with the original topsoil material to the preexisting elevation and replanted with indigenous species.
4. All temporarily disturbed freshwater wetlands and transition areas must be restored to pre-construction conditions following the completion of the authorized activities.
5. This permit to conduct a regulated activity within freshwater wetlands includes the Division's approval of a Water Quality Certificate for these activities.

#### **FRESHWATER WETLAND MITIGATION PERMIT CONDITIONS:**

1. The permittee shall mitigate for the temporary disturbance of 0.002 acres and permanent disturbance of 0.022 ac to freshwater wetlands through an on-site or off-site creation, restoration, or enhancement project or with the purchase of credits from a mitigation bank serving the appropriate watershed management area in accordance with the mitigation hierarchy. (N.J.A.C. 7:7A-11 et seq)
2. **At least 90 days prior to the initiation of regulated activities authorized by this permit**, the permittee shall submit a mitigation proposal to the Division of Land Resource Protection (Division) for review and approval. Activities authorized by this permit shall not begin until the permittee has obtained written approval of a mitigation plan from the Department (N.J.A.C. 7:7A-11.6(a)).

3. **All mitigation shall be conducted prior to or concurrent with the construction of the approved project** (N.J.A.C. 7:7A-11.3(a)). Concurrent means that at any given time, the mitigation must track at the same or greater percentage of completion as the project as a whole.
4. If the permittee fails to perform mitigation within the applicable time-period the acreage of mitigation required shall be increased by 20 percent each year after the date mitigation was to begin (N.J.A.C. 7:7A-11.3(c)).
5. If the applicant is considering obtaining land to satisfy a mitigation requirement, the Department strongly recommends that the permittee obtain the Division's conceptual review and approval of any land being considered as a potential mitigation area.
6. If the permittee is purchasing credits from a mitigation bank to satisfy a mitigation requirement, prior to the initiation of regulated activities authorized by this permit, the permittee shall submit proof of purchase for **0.022** mitigation credits from an approved wetland mitigation bank to the attention of the Mitigation Unit Supervisor, NJDEP, Division of Land Resource Protection at Mail Code 501-02A, P.O. Box 420, Trenton, NJ 08625-0420.

At this time, the following banks are approved to serve the project area; additional banks may be approved at any time, so please contact the Mitigation unit for the most up to date service area information if you would like additional options.

Willow Grove Lake Wetlands Mitigation Bank – Heather Brecht, The Nature Conservancy –  
New Jersey Chapter, 2350 Route 47, Delmont, NJ 08314, Phone: (609) 861-4122, Fax: (609)  
861-4420, or Email: [heather.brecht@tnc.org](mailto:heather.brecht@tnc.org)

7. If the permittee is considering conducting a creation, restoration or enhancement project, the following conditions shall apply:
  - a. **Prior to the initiation of regulated activities** authorized by this permit the permittee shall submit a final design of the mitigation project for approval and include all of the items listed on the checklist entitled [Checklist for Completeness: Creation, Restoration or Enhancement for a Freshwater Wetland Mitigation Proposal](http://www.nj.gov/dep/landuse/forms/index.html) located at <http://www.nj.gov/dep/landuse/forms/index.html>.
  - b. **Prior to the completion of the mitigation project**, the permittee shall complete, sign and file with the County Clerk (the Registrar of Deeds and Mortgages in some counties), a conservation restriction that meets the requirements of N.J.A.C. 7:7A-12.1. The conservation restriction shall include the wetland and required transition area and conform to the format and content of the Wetlands Mitigation Area model conservation restriction that is available at: <http://www.nj.gov/dep/landuse/forms/index.html>. The applicant is required to include a metes and bounds description shown on a map. Within 180 days of the issuance of the mitigation approval, the recorded conservation restriction shall be provided to the Mitigation Unit, NJDEP Division of Land Resource Protection for verification. (N.J.A.C. 7:7A-12.1 et. seq.)
  - c. The permittee shall notify the Mitigation Unit at the Division of Land Resource Protection in writing **at least 30 days prior to the start of construction of the wetland mitigation project** to arrange an on-site pre-construction meeting among the permittee, the contractor, the consultant and the Division.
  - d. To ensure the intent of the mitigation design and its predicted wetland hydrology is realized in the landscape, the mitigation designer shall be present on-site during all critical stages of mitigation construction and during the restoration of any temporarily impacted areas. Critical

stages of construction include but are not limited to herbicide applications, earthmoving activities, planting, and inspections.

- e. The permittee shall be responsible for ensuring that best management practices are used throughout construction to control the spread and colonization of highly invasive plants. Specifically, all equipment, especially tracks and tires, must be thoroughly cleaned every time equipment or vehicles move from an area containing invasive plants or from off-site to the mitigation area. In addition, soil containing root fragments and above-ground vegetative material from invasive plants shall be carefully managed during earthmoving activities and disposed of at a suitable off site location rather than mulched and reused or stockpiled elsewhere on the site. For information on the specific species that are considered to be invasive, please refer to the Invasive Plant Atlas at <http://www.invasiveplantatlas.org/index.html>.
- f. If changes to the mitigation design are necessary to ensure success of the project as a result of on-site conditions, the mitigation designer shall immediately notify the Division in writing and submit an alternative plan which achieves the proposed wetland conditions. The Division shall review the plan in accordance with N.J.A.C. 7:7A-11.7. Any modifications to the plan that are reviewed and approved by the Division must be shown on a signed and sealed revised plan. The As-Built plans required as a part of the Construction Completion Report may serve as the signed and sealed revised plan required to be submitted as part of the construction modification process described above if time constraints warrant such action and have been approved by the Division in writing.
- g. **Within 30 days of final grading of the mitigation site and prior to planting**, the permittee shall notify the Mitigation Unit at the Division of Land Resource Protection in writing to arrange a post-grading construction meeting among the permittee, contractor, consultant and the Division.
- h. **Within 30 days following the final planting of the mitigation project**, the permittee shall submit a Construction Completion Report to the Division detailing as-built conditions (see below) and any changes to the approved mitigation plan that were made during construction (N.J.A.C. 7:7A-11.12). The Construction Completion Report shall contain, at a minimum, the following information:
  - i. A completed [Wetland Mitigation Project Completion of Construction Form](#). This form is located at <http://www.nj.gov/dep/landuse/forms/index.html> and certifies that the mitigation project has been constructed as designed and that the proposed area of wetland creation, restoration or enhancement has been accomplished;
  - ii. As-Built plans which depict final grade elevations at one foot contours and include a table of the species and quantities of vegetation that were planted including any grasses that may have been used for soil stabilization purposes; and
  - iii. Photos of the constructed wetland mitigation project with a photo location map as well as the GPS waypoints in NJ state plane coordinates NAD 1983.
- i. **Within 30 days following final planting of the mitigation project**, the permittee shall post the mitigation area with permanent signs which identify the site as a wetland mitigation project and that all-terrain vehicle use, motorbike use, mowing, dumping, draining, cutting and/or removal of plant materials is prohibited and that violators shall be prosecuted and fined to the fullest extent under the law. The signs must also state the name of the permittee, a contact name and phone number, and the Department's permit number.
- j. The permittee shall monitor **all freshwater wetland and transition area projects** for a minimum of 5 years, unless otherwise stipulated within the approved mitigation proposal,

- beginning the first full growing season after the mitigation project has been completed. The permittee shall submit monitoring reports to the Division of Land Resource Protection no later than December 31<sup>st</sup> of each full monitoring year (N.J.A.C. 7:7A-11.12(g)). All monitoring reports must include the standard items identified in the checklist entitled, "Wetland Mitigation Monitoring Project Checklist", which can be found at <http://www.nj.gov/dep/landuse/forms/index.html>.
- k. Once the required monitoring period has expired and the permittee has submitted the final monitoring report, the Division will make the finding that the mitigation project is either a success or a failure. This mitigation project will be considered successful if the permittee demonstrates all of the following:
- i. That the goals of the wetland mitigation project, including acreage and the required transition area, as stated in the approved wetland mitigation proposal and the permit have been satisfied. The permittee shall submit a field wetland delineation of the wetland mitigation project based on the Federal Manual for Identifying and Delineating Jurisdictional Wetlands (1989) which shows the exact acreage of State open waters, emergent, scrub/shrub and/or forested wetlands in the mitigation area;
  - ii. The site has an 85 percent survival and 85 percent area coverage of the mitigation plantings or target hydrophytes, which are species native to the area and similar to ones identified on the mitigation planting plan. All plant species in the mitigation area must be healthy and thriving and all trees must be at least five feet in height;
  - iii. The site has less than 10 percent coverage by invasive or noxious species.
  - iv. The site contains hydric soils or there is evidence of reduction occurring in the soil; and,
  - v. The proposed hydrologic regime as specified in the mitigation proposal has been satisfied.
- m. The permittee is responsible for assuming all liability for any corrective work necessary to meet the success criteria established above (N.J.A.C. 7:7A-11.12(i)). The Division will notify the permittee in writing if the mitigation project is considered a failure. Within 30 days of notification, the permittee shall submit a revised mitigation plan to meet the success criteria identified above for Division review and approval. The financial surety, if required, will not be released by the Division until such time that the permittee satisfies the success criteria as stipulated above.

#### RIPARIAN ZONE MITIGATION CONDITIONS:

1. **At least 90 days prior to commencing regulated activities authorized by this permit**, the permittee shall submit a proposal to mitigate for the temporary disturbance of 0.0211 ac of herbaceous riparian zone and 0.070 ac of grassed riparian zone, in addition to the permanent loss of 0.385 ac of forested riparian zone vegetation. The proposal shall be designed in accordance with the standards at N.J.A.C. 7:13-13. Activities authorized by this permit shall not begin until the permittee has obtained written approval of a mitigation plan from the Department (N.J.A.C. 7:13-13.2(b)).
2. **All mitigation shall be conducted prior to or concurrent with the regulated activity that causes the disturbance.** (N.J.A.C. 7:13-13.3(a)1). Concurrent means that at any given time, the mitigation must track at the same or greater percentage of completion as the project as a whole.
3. As of the date of this permit, there are no mitigation banks serving your project area. Additional banks may be approved at any time, so please contact the Mitigation Unit for the most up to date service area information if you would like additional options.

4. If the permittee is considering conducting a creation, restoration or enhancement project, the following conditions shall apply:

**Prior to the initiation of regulated activities authorized by this permit**, the permittee shall sign a Department approved conservation restriction to protect the mitigation area from future development that would remove the vegetation planted. (N.J.A.C. 7:13-13.2(g)). The conservation restriction shall conform to the format and content of the rules at N.J.A.C. 7:13-14 and the Riparian Zone Mitigation Area model located at <http://www.nj.gov/dep/landuse/forms/index.html>. The restriction shall be included on the deed and recorded in the office of the County Clerk (the Registrar of Deeds and Mortgages in some counties) in the county wherein the lands of the mitigation project are located. A metes and bounds description shown on a map must be included within the recorded conservation restriction. Within 10 days of filing the conservation restriction, the permittee must send a copy of the conservation restriction to the attention of the Mitigation Unit Supervisor, NJDEP, Division of Land Resource Protection at Mail Code 501-02A, P.O. Box 420, Trenton, NJ 08625-0420.

5. For creation and restoration projects, the permittee shall obtain a secured bond or other financial surety acceptable to the Division from a firm licensed to provide such services in New Jersey. (N.J.A.C. 7:13-13.15)
6. The permittee shall monitor the riparian project for at least 5 years beginning the year after the riparian zone mitigation project has been completed (N.J.A.C. 7:13-13.12(c)). **The permittee shall submit monitoring reports to the Division of Land Resource Protection, no later than December 31<sup>st</sup> of each full monitoring year.**
  - a. All monitoring reports except the final one should include the requirements and goals of the mitigation proposal and a detailed explanation of the ways in which the mitigation has or has not achieved progress toward those goals. If mitigation has not achieved progress, the report shall also include a list of corrective actions to be implemented and a timeline for completion.
  - b. The final monitoring report must include documentation and data demonstrating that:
    - i. The goals of the riparian zone mitigation as stated in the approved riparian zone mitigation proposal and the permit conditions have been satisfied.
    - ii. At least 85 percent of the mitigation plantings have survived and that at least 85 percent of the mitigation area is established with native species similar to ones identified on the mitigation planting plan. All plant species in the mitigation area must be healthy and thriving. All trees must be at least 5 feet in height; and
    - iii. The site is less than 10 percent occupied by invasive or noxious species; and
    - iv. The conservation restriction for the mitigation site has been executed and recorded.
7. If the riparian mitigation project does not meet the success criteria established above the project shall be considered a failure and the permittee shall submit a revised riparian mitigation plan. The revised plan shall be submitted within 60 days of receipt of notification from the Division indicating the riparian mitigation project was a failure.
8. If the Division determines that the riparian zone mitigation project is not constructed in conformance with the approved plan, the permittee will be notified in writing by the Department and will have 60 days to submit a proposal to indicate how the project will be corrected.

For preservation projects, the application shall provide documentation showing that the proposed preservation area will fully compensate in accordance with N.J.A.C. 7:13-13.13 for the loss of functions and values caused by the disturbance.

**STANDARD CONDITIONS:**

1. The issuance of a permit shall in no way expose the State of New Jersey or the Department to liability for the sufficiency or correctness of the design of any construction or structure(s). Neither the State nor the Department shall, in any way, be liable for any loss of life or property that may occur by virtue of the activity or project conducted as authorized under a permit.
2. The issuance of a permit does not convey any property rights or any exclusive privilege.
3. The permittee shall obtain all applicable Federal, State, and local approvals prior to commencement of regulated activities authorized under a permit.
4. A permittee conducting an activity involving soil disturbance, the creation of drainage structures, or changes in natural contours shall obtain any required approvals from the Soil Conservation District or designee having jurisdiction over the site.
5. The permittee shall take all reasonable steps to prevent, minimize, or correct any adverse impact on the environment resulting from activities conducted pursuant to the permit, or from noncompliance with the permit.
6. The permittee shall immediately inform the Department of any unanticipated adverse effects on the environment not described in the application or in the conditions of the permit. The Department may, upon discovery of such unanticipated adverse effects, and upon the failure of the permittee to submit a report thereon, notify the permittee of its intent to suspend the permit.
7. The permittee shall immediately inform the Department by telephone at (877) 927-6337 (WARN DEP hotline) of any noncompliance that may endanger public health, safety, and welfare, or the environment. The permittee shall inform the Division of Land Resource Protection by telephone at (609) 777-0454 of any other noncompliance within two working days of the time the permittee becomes aware of the noncompliance, and in writing within five working days of the time the permittee becomes aware of the noncompliance. Such notice shall not, however, serve as a defense to enforcement action if the project is found to be in violation of this chapter. The written notice shall include:
  - i. A description of the noncompliance and its cause;
  - ii. The period of noncompliance, including exact dates and times;
  - iii. If the noncompliance has not been corrected, the anticipated length of time it is expected to continue; and
  - iv. The steps taken or planned to reduce, eliminate, and prevent recurrence of the noncompliance.
8. Any noncompliance with a permit constitutes a violation of this chapter and is grounds for enforcement action, as well as, in the appropriate case, suspension and/or termination of the permit.
9. It shall not be a defense for a permittee in an enforcement action that it would have been necessary to halt or reduce the authorized activity in order to maintain compliance with the conditions of the permit.
10. The permittee shall employ appropriate measures to minimize noise where necessary during construction, as specified in N.J.S.A. 13:1G-1 et seq. and N.J.A.C. 7:29.

11. The issuance of a permit does not relinquish the State's tidelands ownership or claim to any portion of the subject property or adjacent properties.
12. The issuance of a permit does not relinquish public rights to access and use tidal waterways and their shores.
13. The permittee shall allow an authorized representative of the Department, upon the presentation of credentials, to:
  - i. Enter upon the permittee's premises where a regulated activity, project, or development is located or conducted, or where records must be kept under the conditions of the permit;
  - ii. Have access to and copy, at reasonable times, any records that must be kept under the conditions of the permit;
  - iii. Inspect, at reasonable times, any facilities, equipment, practices, or operations regulated or required under the permit. Failure to allow reasonable access under this paragraph shall be considered a violation of this chapter and subject the permittee to enforcement action; and
  - iv. Sample or monitor at reasonable times, for the purposes of assuring compliance or as otherwise authorized by the Federal Act, by the Freshwater Wetlands Protection Act, or by any rule or order issued pursuant thereto, any substances or parameters at any location.
14. The permittee shall not cause or allow any unreasonable interference with the free flow of a regulated water by placing or dumping any materials, equipment, debris or structures within or adjacent to the channel while the regulated activity, project, or development is being undertaken. Upon completion of the regulated activity, project, or development, the permittee shall remove and dispose of in a lawful manner all excess materials, debris, equipment, and silt fences and other temporary soil erosion and sediment control devices from all regulated areas.
15. The permittee and its contractors and subcontractors shall comply with all conditions, site plans, and supporting documents approved by the permit.
16. All conditions, site plans, and supporting documents approved by a permit shall remain in full force and effect, so long as the regulated activity, project, or development, or any portion thereof, is in existence, unless the permit is modified pursuant to the rules governing the herein approved permits.
17. The permittee shall perform any mitigation required under the permit in accordance with the rules governing the herein approved permits.
18. If any condition or permit is determined to be legally unenforceable, modifications and additional conditions may be imposed by the Department as necessary to protect public health, safety, and welfare, or the environment.
19. Any permit condition that does not establish a specific timeframe within which the condition must be satisfied (for example, prior to commencement of construction) shall be satisfied within six months of the effective date of the permit.

20. A copy of the permit and all approved site plans and supporting documents shall be maintained at the site at all times and made available to Department representatives or their designated agents immediately upon request.
21. The permittee shall provide monitoring results to the Department at the intervals specified in the permit.
22. A permit shall be transferred to another person only in accordance with the rules governing the herein approved permits.
23. A permit can be modified, suspended, or terminated by the Department for cause.
24. The submittal of a request to modify a permit by the permittee, or a notification of planned changes or anticipated noncompliance, does not stay any condition of a permit.
25. Where the permittee becomes aware that it failed to submit any relevant facts in an application, or submitted incorrect information in an application or in any report to the Department, it shall promptly submit such facts or information.
26. The permittee shall submit written notification to the Bureau of Coastal and Land Use Compliance and Enforcement, 401 East State Street, 4th Floor, PO Box 420, Mail Code 401-04C, Trenton, NJ 08625, at least three working days prior to the commencement of regulated activities.
27. The permittee shall record the permit, including all conditions listed therein, with the Office of the County Clerk (the Registrar of Deeds and Mortgages, if applicable) of each county in which the site is located. The permit shall be recorded within 30 calendar days of receipt by the permittee, unless the permit authorizes activities within two or more counties, in which case the permit shall be recorded within 90 calendar days of receipt. Upon completion of all recording, a copy of the recorded permit shall be forwarded to the Division of Land Resource Protection at the address listed on page one of this permit.

**APPROVED PLAN(S):**

The drawing(s) hereby approved consist of two hundred fifty nine (259) sheet(s) prepared by McCormick Taylor Inc, dated November, 2020, unrevised, unless otherwise noted, and collectively entitled:

“NEW JERSEY DEPARTMENT OF TRANSPORTATION, PLANS OF ROUTE 70, ROUTE 38 TO COOPER AVE, CONTRACT NO. 000113380, PENNSAUKEN TOWNSHIP, CHEERY HILL TOWNSHIP, EVESHAM TOWNSHIP, CAMDEN COUNTY, BURLINGTON COUNTY”,

- “PERMIT PLANS”, sheet nos. PK-1 of PK-1,
- “PERMIT PLANS” sheet PP-1, PP-28, and PP-28A of PP-98, last revised 12/10/21, “PERMIT PLANS”, sheet no. **APPEAL OF DECISION:**

Any person who is aggrieved by this decision may submit an adjudicatory hearing request within 30 calendar days after public notice of the decision is published in the DEP Bulletin (available at [www.nj.gov/dep/bulletin](http://www.nj.gov/dep/bulletin)). If a person submits the hearing request after this time, the Department shall

deny the request. The hearing request must include a completed copy of the Administrative Hearing Request Checklist (available at [www.nj.gov/dep/landuse/forms.html](http://www.nj.gov/dep/landuse/forms.html)). A person requesting an adjudicatory hearing shall submit the original hearing request to: NJDEP Office of Legal Affairs, Attention: Adjudicatory Hearing Requests, Mail Code 401-04L, P.O. Box 402, 401 East State Street, 7th Floor, Trenton, NJ 08625-0402. Additionally, a copy of the hearing request shall be submitted to the Director of the Division of Land Resource Protection at the address listed on page one of this permit. In addition to your hearing request, you may file a request with the Office of Dispute Resolution to engage in alternative dispute resolution. Please see [www.nj.gov/dep/odr](http://www.nj.gov/dep/odr) for more information on this process.

If you need clarification on any section of this permit or conditions, please contact the Division of Land Resource Protection's Technical Support Call Center at (609) 777-0454.
